**Expiry Date:** 2024-05-26

The Notified Body hereby declares that the requirements of Annex II, excluding section 4 of the directive 93/42/EEC have been met for the listed products. The above named manufacturer has established and applies a quality assurance system, which is subject to periodic surveillance, defined by Annex II, section 5 of the aforementioned directive. For placing on the market of class III devices covered by this certificate an EC design-examination certificate according to Annex II, section 4 is required.

## DECLARATION OF CONFORMITY

We, TERUMO CORPORATION

44-1, 2-chome, Hatagaya, Shibuya-ku, Tokyo 151-0072, Japan

being the manufacturer of:

### RADIFOCUS Introducer II

Product : Catheter Introducer

declare that the above products of **Class IIa** are in conformity with the provisions of the EC Council Directive 93/42/EEC of 14 June 1993, as amended, concerning medical devices, and have been subject to the conformity assessment procedure laid down in Article 11, 2 and 11, 3(a) of the Directive, relating to the "Full quality assurance" set out in Annex II, and by certification of Annex II, excluding Section 4 under the supervision of TÜV Rheinland LGA Products GmbH (Registration No.: HD 60145252 0001), Tillystraße 2, 90431 Nürnberg Germany, as Notified Body authorized by the German Competent Authority and carrying the Notified Body No. 0197.

Authorized European Representative :

TERUMO EUROPE N.V.

Interleuvenlaan 40, 3001 Leuven, Belgium

Object of the declaration: see Appendix A

## ENGLISH

**MARIE'S INTRODUCER II** Introducer

**DESCRIPTION / DESIGNATION**

The RADIFOCUS INTRODUCER II consists of an introducer (a sheath and a dilator), a mini guide wire, and a catheter. It is used for endoscopy, surgery, and interventional procedures. The catheter has a side port for aspiration and irrigation. The outer surface of the outer sheath is ribbed. Rapid withdrawal of the dilator may result in incomplete closing of the 1-way valve. To avoid this, the dilator must be closed before removing the outer sheath. The outer surface of the sheath is wet, it becomes very lubricious and the friction coefficient is largely reduced. The outer sheath is designed to facilitate the insertion of angiographic, electrode, balloon, or similar catheter.

**COMPONENTS**

Components include: Dilator, sheath, mini guide wire, catheter, and hub.

Dilator: Dilator hub with a hub stopper to allow the sheath to move axially.

Sheath: Sheath hub with a side port for aspiration and irrigation.

Mini Guide Wire: A thin wire used for catheter tracking, sheath placement, and orientation.

Catheter: Catheter hub with a side port for aspiration and irrigation.

**WARNINGS / PRECAUTIONS**

• Do not use a metal catheter as an entry needle. Withdrawal of the mini guide wire through a metal catheter is a potential hazard. Insertion of the catheter over the mini guide wire may lead to damage to the vessel wall or the release of fragments.

• Use of alcohol, antiseptic solutions or other solvents must be avoided, as they may damage the outer surface of the outer sheath.

**CONTRAINdications**

No contraindication specific to the standard contra indications, considering good clinical practice, by performing arterial diagnostic or interventional procedures.

**COMPLICATIONS**

Potential complications include, but are not limited to: aspergillosis, bleeding, infection, tissue trauma, perforation of vessel wall, air embolism, pseudo aneurysm formation, hematoma, thrombus formation.

**WARNINGS / PRECAUTIONS**

• **HANDLING:** Do not use a metal catheter as an entry needle. Withdrawal of the mini guide wire through a metal catheter is a potential hazard. Insertion of the catheter over the mini guide wire may lead to damage to the vessel wall or the release of fragments.

• **Syringe:** 2.5 ml plastic.

• **Hub:** Standard metalic hub.

• **Caution:** Do not place sheath on the sheath hub.

• **Storage:** After the intended procedure is completed, remove the catheter and then the sheath.

**NOTES TO THE USER**

No notes to the user.

**FRANCIS CAUTIONS**

• Do not use a metal catheter as an entry needle. Withdrawal of the mini guide wire through a metal catheter is a potential hazard. Insertion of the catheter over the mini guide wire may lead to damage to the vessel wall or the release of fragments.

• Use of alcohol, antiseptic solutions or other solvents must be avoided, as they may damage the outer surface of the outer sheath.

**CONTRAINdications**

No contraindication specific to the standard contra indications, considering good clinical practice, by performing arterial diagnostic or interventional procedures.

**COMPLICATIONS**

Potential complications include, but are not limited to: aspergillosis, bleeding, infection, tissue trauma, perforation of vessel wall, air embolism, pseudo aneurysm formation, hematoma, thrombus formation.

**WARNINGS / PRECAUTIONS**

• Before use, confirm the instructions for the drugs and devices to be used along with any contraindication or side effect information.

• This product has been sterilized by ethylene oxide gas. For single use only. Do not reuse.

• Use of alcohol, antiseptic solutions or other solvents must be avoided, as they may damage the outer surface of the outer sheath.

• Use appropriate anti-coagulant therapy to the patient.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

**PRECAUTIONS**

• Before use, confirm the instructions for the drugs and devices to be used along with any contraindication or side effect information.

• This product has been sterilized by ethylene oxide gas. For single use only. Do not reuse.

• Use of alcohol, antiseptic solutions or other solvents must be avoided, as they may damage the outer surface of the outer sheath.

• Use appropriate anti-coagulant therapy to the patient.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.

• Manipulate the mini guide wire slowly and carefully not to damage the vessel wall, once in the tip position and movement under fluoroscopy.

• Remove the catheter and then the sheath.
