VISION CARE

Eye Visc

Hydroxy Propyl Methyl Cellulose (HPMC) Ophthalmic Solution USP 2.0% W/V

EYEVISC PFS is a sterile, transparent, isotonic, non-pyrogenic, viscoelastic preparation of a non-inflammatory, highly purified grade Hydroxypropyl methylcellulose 2% w/v dissolved in a physiological buffer for intraocular application during the anterior segment surgeries. It contains no preservative.

Properties

- Indicated as ophthalmic surgical aid in anterior segment surgical procedures
- Useful in intra-operative surgical procedures like cataract extraction and intraocular lens implantation.
- Maintains a deep chamber during anterior segment surgery
- Allows for more efficient manipulation with less trauma to the corneal endothelium and other ocular tissues.
- Easily removable at the end of the surgery

Packaging:

- Medical grade blister and sterile packaging
- Supplied with one sterile single use 23G cannula
