

Ford Transit Parts catalogue

The Ford Transit was introduced in 1965 and has been a familiar sight on the UK's roads ever since. Originally available in SWB and LWB van formats between 12 cwt and 35 cwt together with a number of chassis cab options, the Transit was quick to secure a wide customer base.

The Mk1 Model was updated in 1978 with the introduction of the Mk2. The Mk2 model shared the same basic load panels with the Mk1 but featured a revised front end styling. The Mk2 remained in production until 1986.

In 1987 Ford introduced the Mk3 Transit which featured a revised body shell and panels. The Mk3 bodyshell and panels remained predominantly the same through the introduction of the Mk4 in 1992 and the Mk5 in 1995. The Transit in Mk5 form secured a huge following from the UK commercial operators and today the Mk5 still remains popular amongst Transit owners due to its mechanical simplicity. The Mk5 Transit has affectionately become known as a 'Smiley' due to the distinctive shape of the front grill.

In 2000 Ford made a significant change with the introduction of the Transit Mk6. This witnessed a move from the traditional rear wheel drive only format that had been the mainstay of the Transit van range for over 35 years. The Mk6 was available in both RWD and FWD forms. The Mk7 arrived in 2006 featuring a facelift to the front end body styling and continues to offer both RWD and FWD powertrain formats.

Throughout its production span, the Transit has used a wide variety of engines in both petrol and diesel form. The engines have often been shared with the Ford passenger cars of the corresponding era and have ranged from V4 and V6 petrol through to in-line 4 cylinder petrol and diesel. Diesel engines originally appeared as Perkins units which were later changed to a Ford unit known as the 'York' engine.

The Transit is familiar in its basic panel van or chassis cab format and occasionally in 'people carrier' form where it carried the Tourneo designation. The Transit has also been produced on 4x4 versions known as the Transit County.

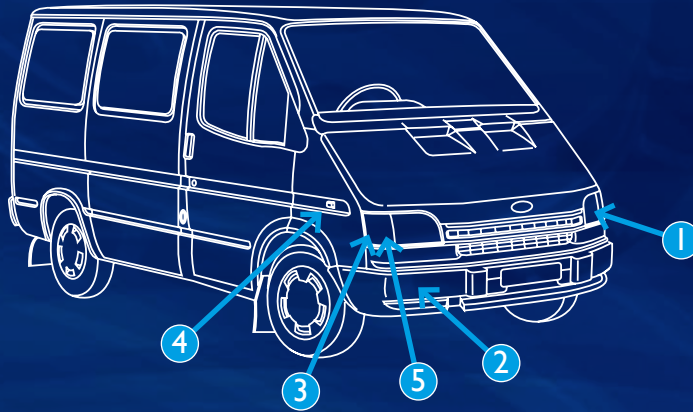

TTC is the UK's leading aftermarket supplier for Commercial Vehicle components. A full range of products are now available for Ford Transit models from the Mk4 onwards, including Body components, Body Panels, Braking, Steering and Suspension, Engine and Transmission.

TTC "The Quality Alternative" range of products available for the Ford Transit range include: Brake Pads, Brake Discs, Lighting, Steering and Suspension, Waterpumps and Mirrors.
