TECHNOLOGIES IN EDUCATION**

July 9, 2024

To Whom It May Concern,

I am writing to highly recommend Esempla Systems for their outstanding performance in the design, development, configuration, and deployment of the Register of Driving Schools and Trainees information system for the Ministry of Education, Culture and Research of Moldova (Contract No. 1631040, November 2020 - September 2021).

Esempla Systems demonstrated exceptional technical proficiency in creating an integrated IT system that significantly enhanced the efficiency and transparency of our driving license application process. Their innovative approach to automating business processes and project management was evident throughout the project's lifecycle. They successfully deployed an integrated IT system leveraging a robust technical environment, including IaaS through MCloud, Gov PaaS solutions such as MConnect, MPass, MSign, MNotify, MLog, MCabinet, MPay and a sophisticated technology stack including Spring Framework, Angular, and Docker, ensuring seamless interoperability across national registers and information systems. The utilization of a microservices architecture alongside a comprehensive technology stack without leaning on specific programming languages exemplifies their adaptability and technical prowess.

The team, composed of dedicated professionals, namely Tatiana Berlinschi, Daniela Motpan, Sergiu Garaba, Vitalie Lazari, Mihai Gaidau, Antonina Ceban, and Nicoleta Ionas, tackled the project with a hybrid development methodology. Esempla's project management approach, combining agile and traditional methodologies, ensured flexibility and continuous improvement. The team demonstrated exceptional skills in business analysis, software development, and system integration, ensuring that the project's execution was both flexible and disciplined, thereby achieving its desired outcomes.

I am highly satisfied with Esempla's performance and their ability to deliver complex, high-value projects on time and within budget. Their commitment to innovation and client satisfaction makes them a trusted partner for any organization seeking reliable and cutting-edge software development services.

Sincerely,

Arcadi Malearovici
Vice Director,
Center for Information and Communication Technologies in Education
