

To whom it may concern:

Through this document we are confirming that in year 2020 and beginning of 2021 we had a rental contract for a leachate treatment plant with the company Hofstetter.

The contract went well and installation, commissioning, operation of the leachate treatment plant was done by Hofstetter with his employees.

At end of the rental contract a sales contract was concluded.

Hofstetter performed for 6 months trial operation, maintenance and all needed analysis and tests to confirm the good performance of the leachate treatment plant.

Thank you,

Dipl. Ing. **Andreas Flach**
