

FlowWeave BIOSEAL

Woven vascular prostheses:

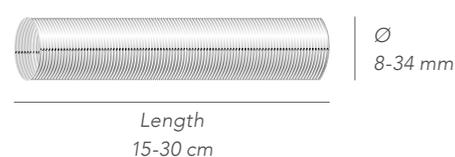

- Specific weaving techniques for high burst resistance and low dilatation^{1,2}
- Different internal and external surface structures enable blood flow optimization
- Aldehyde and isocyanate free BIOSEAL impregnation using dehydrothermal crosslinked collagen guarantees primary sealing of the blood in the prosthesis³
- Concentric crimping and the guide line allow precise positioning of the prosthesis
- Soft and supple texture for easy handling

Indications: FlowWeave BIOSEAL is indicated in arterial aneurysms and vascular occlusions. The primary indication for FlowWeave BIOSEAL is vascular replacement in the thoracic and abdominal aortas, although it can also be used in peripheral vascular applications involving vessel diameters of at least 6 mm.
