Letter of Recommendation

I had the opportunity to work closely with EBS Integrator on a digital transformation project. I must say that their expertise and dedication were truly commendable. They undertook the task of creating a mobile app for Lensa, an ecommerce company, and the results were outstanding.

One aspect that truly stood out during the collaboration was EBS Integrator's ability to integrate existing technologies into the mobile app. By accommodating Lensa's costly technologies through API integration, they effectively reduced expenses and minimized any potential friction for the client. EBS Integrator's team went above and beyond to refactor the existing API code, optimizing workflows and requests to handle high traffic and deliver a smooth user experience.

Throughout the development process, EBS Integrator maintained transparent communication and collaboration with Lensa. Their dedication to understanding Lensa's evolving needs ensured that the mobile app was precisely tailored to meet client expectations. By adopting an Agile framework, EBS Integrator reduced development time by 30% and stayed 25% under budget. This demonstrated their efficiency and commitment to delivering successful results.

Regular feedback sessions allowed quick adaptation to changing requirements. EBS Integrator's transparency ensured Lensa had a clear picture of development progress at all times. The end result was a market-ready mobile app that perfectly aligned with Lensa's objectives, driving conversion rates, increasing brand awareness, and fostering customer loyalty.

Thank you, EBS Integrator, for your outstanding work in transforming Lensa's digital presence.

Best regards,

CEO & Founder

Daniel Crăciun
