**Portex® Choice Tracheal Tubes for the Operating Room**  
**Affordable quality - SMILE!**

**AIRWAY MANAGEMENT**

**PORTEX™**

## The New Portex<sup>®</sup> Tracheal Tube

**Smiths Medical, a leading global provider of medical devices, is pleased to announce the launch of the new Portex<sup>®</sup> Tracheal Tube.**

**The new Portex<sup>®</sup> Tracheal Tube is the first choice tube for everyday intubation, meeting all the clinical requirements expected of a short-term tube for the operating room.**

### Affordable quality

Portex<sup>®</sup>, a renowned brand in airway products, has created a high quality tracheal tube that incorporates all the superior features expected from a Smiths Medical product, yet at an affordable price.

The new Portex<sup>®</sup> Tracheal Tube is perfect for the majority of all operating room procedures of a short duration.

### Low pressure seal

The new Portex<sup>®</sup> Tracheal Tube has a low pressure, high volume barrel cuff, reducing the risk of creasing on inflation and in turn minimising the pressure on the tracheal wall.

The large cuff resting diameter relieves the pressure on the tracheal wall ensuring patient safety and comfort.

15mm connector

Radio-opaque line

Low pressure high volume cuff

Intubation depth marker

Smooth Murphy eye

Printed pilot balloon

### Superior smooth finish

Unlike some competitor tubes that contain a sharp, cold cut edge to the Murphy eye, the new Portex® Tracheal tube contains a smooth and polished Murphy eye.

It also has been smoothed and fully blended to the cuff edge to minimise the risk of trauma to the patient during intubation.

### Easily identifiable

A blue radio-opaque line can be seen on the full length of the new Portex® Tracheal Tube to allow the verification of tube positioning within the patient via X-ray.

The tube is made out of clear, implant-tested PVC, therefore correct intubation is confirmed when the tube 'mists'.

All markings on the tube are clearly printed and include an intubation depth marker, vocal cord distal markings and an oral/nasal cut line.

### Fully informed

The new Portex® Tracheal tube incorporates a smooth edged pilot balloon that displays the size and maximum inflation pressure allowing for the relevant size to be identified, even when in situ. The balloon changes shape when inflated and contains a central channel so it will not collapse if the cuff needs to be deflated quickly in an emergency situation.

The inflation line is blue to reduce the risk of being accidentally cut.

## Portex® Choice Tracheal Tube

For short-term intubation within the operating room

### ORDERING INFORMATION

Product Code	I.D.(mm)	O.D.(mm)	Cuff resting diam.(mm)	Pack Qty
100/150/050	5.0	6.7	22	10
100/150/055	5.5	7.3	22	10
100/150/060	6.0	8.0	24	10
100/150/065	6.5	8.5	24	10
