From products that comply with benchmarks to products that set new ones.

Nulife Inflexion Orthopedic Gloves

(Powder-free, Sterile, Latex Surgical Gloves)

Product Information

Nulife Inflexion Orthopedic Gloves are designed to provide extra protection during complicated or rigorous orthopedic surgeries, particularly against sharp bone fragments and other surgical debris.

The surface of the gloves is designed to maximise instrument grip and comfort. Even though our gloves are thicker, we have low modulus.

These gloves are powder-free thus preventing an inflammatory response by the patient's immune system, leading to the formation of fibrous bands and post-operative adhesions during surgery on a patient having powder allergy.

The gloves are also very comfortable for doctors to wear.

Nulife Inflexion gloves are specially packed in SteriSafe pouches thus ensuring high sealing integrity.

Special Features

- Beaded cuffs to prevent the gloves from rolling down
- Unique brown colour minimises eyestrain in the operation theatre, providing a good contrast to light-coloured organs and improving visibility
- Anatomical design to reduce fatigue during extended surgery
