

Specifications

Conditions of Sale

STANDARD: The seller's standard conditions of sale set forth in Price Sheet 153 apply, except as modified under "WARRANTY QUALIFICATIONS" below.

SPECIAL TO THIS PRODUCT:

INCLUSIONS: S&C Type XS Fuse Cutouts are assigned single-value nominal voltage ratings (not "dual," "slant," or "system voltage class" ratings) and are applicable, without restriction, on all three-phase systems having system maximum operating voltage (line-to-line) less than or equal to the cutout maximum voltage. Type XS Fuse Cutout interrupting ratings have been substantiated by testing performed in accordance with IEEE C37.41-2000. Recognizing that under certain fault conditions cutouts can be exposed to voltages in excess of system line-to-neutral voltage—faults the cutouts *should* clear with no reliance on backup devices—S&C has tested Type XS Fuse Cutouts at *full system line-to-line voltage* across a wide spectrum of available fault currents using transient-recovery voltages realistically representative of those the cutout will see in actual service.

A choice of connector arrangements is available—some at an extra charge—as listed in Table 2 on page 4. Specify the connector arrangement desired by adding the appropriate suffix letter to the catalog number of the selected cutout.

All S&C Type XS Fuse Cutouts and Disconnects listed are equipped with hooks for use with Loadbuster®—The S&C Loadbreak Tool.

EXCLUSIONS: Overhead—pole-top style cutouts do not include fuse links or mounting brackets.

Mounting brackets for these cutouts are available, at an extra charge, as listed in Table 2 on page 4.

WARRANTY QUALIFICATIONS: The standard warranty contained in the seller's standard conditions of sale (as set forth in Price Sheet 153) does not apply to S&C Type XS Fuse Cutouts, Outdoor Distribution, when installed in conjunction with fuse tubes or disconnect blades not manufactured by S&C, nor does it apply to S&C fuse tubes and disconnect blades installed in cutouts not manufactured by S&C.

How to Order A Complete Type XS Fuse Cutout

1. Obtain the catalog number of the desired fuse cutout from Table 1 on pages 2 and 3.
2. Select mounting bracket (if desired), connector arrangement (required), and other options (if desired) from Tables 2 and 3 on page 4. Add the indicated suffix letter(s) to the catalog number selected in Step 1, above.

How to Order Handling Tools

Obtain the catalog number(s) of recommended handling tool(s) from Table 4 on page 4. Refer to Specification Bulletin 851-31.

★ S&C Type XS Fuse Cutouts are manufactured in accordance with a quality system certified to ISO 9001:2000. Single-shot Overhead—Pole-Top Style Type XS Fuse Cutouts are sold in the United States, Canada, and all countries in the Caribbean (excluding countries located on the mainland of South America and Central America) by MacLean Power Systems, www.maclepower.com.

① Specify mounting bracket, if desired, and connector option by adding suffix letter(s) to catalog number. For example, 89031R10-BD. See Table 2 on page 4.

② Uses either nonremovable or removable buttonhead fuse links.

③ Uses removable buttonhead fuse links only.

● Applicable for protection of single-phase-to-neutral circuits (lines or transformers) only and grounded-wye connected capacitor banks in solidly grounded-neutral (multigrounded-neutral) systems—where the leakage distance to ground meets user's requirements.

■ Approximate fuse-tube length, top of fuse-tube cap to bottom of fuse tube: 14¾ inches (375 mm).

▲ Approximate fuse-tube length, top of fuse-tube cap to bottom of fuse tube: 18¼ inches (464 mm).

◆ Leakage distance to ground is 26 inches (660 mm) for catalog numbers 89053R10 and 89253R10. A 28.3-inch (719-mm) leakage distance also available. Contact your nearest S&C Sales Office.

▼ Product discontinued.

① Specify mounting bracket, if desired, and connector option by adding suffix letter(s) to catalog number. For example, 89221R10-BD. See Table 2 on page 4.

② Dimension applies to cutout furnished with optional NEMA Type B Mounting Bracket (cutout catalog number suffix “-C”). If cutout is furnished with optional S&C Extended Mounting Bracket (cutout catalog number suffix “-B”), dimension is 5⅝ inches (132 mm).

③ Dimension applies to cutout furnished with optional parallel-groove connectors (cutout catalog number suffix “-D”). If cutout is furnished with optional eye-bolt connectors (cutout catalog number suffix “-M”), dimension is slightly smaller.

④ Dimension applies to cutout furnished with optional NEMA Type B Mounting Bracket (cutout catalog number suffix “-C”). If cutout is furnished with optional S&C Extended Mounting Bracket (cutout catalog number suffix “-B”), dimension is 1½ inches (38 mm).

① Cutouts having catalog number supplement “-R11,” “-R10,” “-R9,” “-R8,” or “-R7.” For example, 89021R10-BD.

② Cutouts having catalog number supplement “-R6” or lower. For example, 89021R5-BD.

③ From top of fuse-tube cap to bottom of fuse tube.

④ Specify mounting bracket, if desired, and connector option by adding suffix letter(s) to catalog number. For example, 89811R10-BD. See Table 2 on page 4.
