A MASTER PIECE OF ART & SCIENCE

At ASAP, our concept is a mix of art and science. Each piece of ASAP glove is a combination of these two elements which aims to provide superior protection, satisfying the needs of every individual glove user.

Why the combination?

Art

Is born from creative ideas, we embrace and appreciate imaginative skills of manufacturing processes aimed to produce cutting-edge gloves.

Science

Time, investment and years of experience in R&D to create technologically advanced and relevant gloves for stronger protection.

Ground-breaking ideas fused together with advance technology positions ASAP gloves at the forefront among its industry peers. Successfully perfecting this combination has propelled ASAP gloves to another level: providing superior protection, excellent tactile sensitivity, without compromising comfort and strength.

Made uniquely to suit professional use in the healthcare, research and development, building and constructions, food and beverages and varieties of other needs and industries. ASAP provides a wide range of gloves which include latex and nitrile examination gloves, high-risk and cleanroom gloves, Vinyl and Thermo PE gloves.

‘LIFE MATTERS’ is firmly grounded in ASAP’s fundamental core value. In order to honour each and every element of life as well as awareness on the importance of protection for all means, we are inspired to embark on corporate social responsibility that pertains to the conservation of endangered lives.

Choose a masterpiece of Art and Science, choose ASAP.

Hygiene Matters

At ASAP, we are committed to hygiene control and quality assurance. Proper hygiene standard is practised throughout the development of all ASAP products – from raw materials handling, processing, production, inspection, to our finished product to deliver high quality products while limiting the risk of cross contamination.

Look for the Hygiene Matters logo, quality and hygiene you can trust.

LATEX POWDERED

- Smooth surface finish for excellent tactile sensitivity, strength and dexterity
- Lightly powdered with absorbable cornstarch (USP) for easy donning
 - Good grip in a moist environment with ideal tactile sense for sensitive operations

Colors Available:

LATEX POWDER FREE

- Conforms to the contour of your hand for comfort
- Minimize tearing, peeling & cracking with the strength of copolymer
- Smooth polymer interior coating improves moist or dry donning efficiency
- Powder free and protein-rated to minimize exposure to allergens and irritants
- Beaded cuff to help prevent roll-down
- Micro textured surface delivers consistent grip under all operating conditions

Colors Available:

NITRILE POWDER FREE

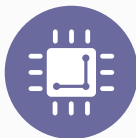

- Ideal alternative when latex allergies are of concern
- Soft yet three times the puncture resistance of latex with high resistance to chemicals
- Textured fingers and palm for excellent grip, exceptional comfort and fit for higher tactile sensitivity
- Good durability for extended wearing
- Colored glove for easy identification as a synthetic glove

**** Chemotherapy Drug Tested Nitrile Powder Free Examination Gloves are available in black (20100 Series) and light blue (21190 Series) colors.**

Colors Available:

Colors Available:

X-TENDED & PRO X-TENDED

- Extended cuff for additional protection and extra security against cross contamination
- Reliable thickness that delivers added durability for extended periods of time
- Beaded cuff design helps prevent gloves from rolling down
- Offer greater resistance to abrasions (Latex) and punctures (Nitrile)

HIGH RISK

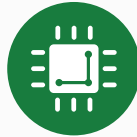

- Extra protection against bloodborne pathogens and infectious liquids
- Ideal for multiple heavy duty tasks
- Offer greater resistance to abrasions (Latex) and punctures (Nitrile)
- Extended cuff for additional protection with cuff design helps prevent gloves from rolling down
- Textured surface ensure strong, efficient grip

Colors Available:

CLEANROOM

- Washed repeatedly in ultrapure deionised water, ensure consistent control of particles & extractables
- Exceptional wet/dry grip without compromising tactile sensitivity
- Nitrile polymer, an excellent alternative for workers with latex allergies (Nitrile Cleanroom)
- Reduce the risk of cross-contamination and provides a barrier against splashes
- Comfortable fit, textured, excellent dexterity and tactile sensitivity
- Available in both sterilised and non-sterile versions

Colors Available:

SURGICAL

- Manufactured in a totally integrated facility certified to ISO 9001 standards
- These gloves provide exceptional cleanliness and confirmation of sterility
- Packaged to allow aseptic donning
- The inherent physical properties of natural rubber offer flexibility and elasticity with excellent comfort
- Hand specific latex gloves feature a textured surface for enhanced grip and a beaded cuff for stability on the arm
 - Up to 8 sizes provided for exceptional fit that can reduce hand fatigue

Colors Available:

BIODEGRADABLE NITRILE

- Specially formulated to degrade 10 times faster compared with any conventional nitrile gloves.
- Biodegrades more than 40% in merely 2 years in anaerobic digestion environments.
- Biodegradability has been tested and proven adhering to ASTM D5511 international standard.

*** Biodegradability tested in controlled anaerobic digestion environment designed to mimic the conditions of active landfills where microbes are present, and aids in accelerating the biodegradation process.*

SUPER THICK *Pro*

- A special chemical resistant formulation used in creating these gloves for a peace of mind while working
- Robust construction and durability able to withstand tearing and puncture during heavy-duty work with ease while nitrile properties ensure comfortability even when worn across a prolonged period
- Perfect hand protection solution for tasks that are bound to be in contact with harsh and dangerous chemicals

Colors Available:

CHEMICAL RESISTANT NITRILE

- Worry-free performance with resistance against accidental rips, tears, and punctures
- Cotton flock inner lining ensures next-level comfort and better perspiration and moisture absorption
- Anatomical-fit which conforms to the natural shape of our hands, keeping hand fatigue at bay even under challenging conditions

Colors Available:

NITRILE DISPOSABLE

- Unique formulation provides wearer extra comfort while minimizing hand tiredness for a prolonged usage.
- Improved fingertip texture offers greater grip and enhanced control regardless of the condition.
- The super lightweight glove provides wearer exceptional tactile sensitivity and finger dexterity

Colors Available:

VINYL DISPOSABLE

- Suitable for frequent glove changes in low risk work environments, providing affordable protection while limiting cross contamination.
- These odor free gloves are suitable for handling odor sensitive applications such as food items or dental operations.

Colors Available:

T-GRIP DISPOSABLE

- Diamond textured surface, channels away the liquid to provide excellent grip in dry and wet condition
- Made with Nitrile materials which offer greater resistance to chemicals and punctures
- Ideal to use for heavy-duty tasks

Colors Available:

Colors Available:

X-TENDED T-GRIP

- Extended cuff length measuring at 300mm offers increased protection under all circumstances.
- Diamond textured surface, channels away the liquid to provide excellent grip.
- Made with Nitrile materials, this is the toughest glove in our lineup weighing at 12 mil and are strong enough to resist rips, tears, and punctures.

NIVINYL

- A hybrid blend of vinyl and nitrile compounds with superior fit and strength better than normal vinyl gloves
- Enhanced elongation and superior elasticity providing better puncture and tear resistance compared to conventional nitrile gloves, with 3 times the strength of conventional vinyl gloves
- The unique blend of vinyl and nitrile properties provides these gloves with better anti-aging characteristics

Colors Available:

FACE MASK

- 100% latex free and dye free layer
- Light weight and economical
- BFE and particle filtration >95% efficiency

Anti-Splash Visor Face Mask

- Wide eye shield reduces glare ensuring clear vision with prolonged anti fog properties.
