

Yumizen G800

Hemostasis Analyzer

Automatic bench-top hemostasis analyzer for laboratories with mid-size workloads.

Smart way to test

- 4 Independent measuring channels
- 14 coxied + 4 reagent embedded positions
- 10 samples + 5 STAT sample positions
- Automatic reflex and rerun capacity
- Master calibration curve (no calibration needed)

Comprehensive Security

- Positive identification
- Internal data storage, integrated computer
- Ready-to-use reagents

Increased efficiency

- 3 reference measuring methods: clotting, immuno-turbidimetric and chromogenic
- Continuous loading: 60 samples / 600 cuvettes
- Throughput 160PT tests/hour
- Maintenance free
