

volumetric measurement & liquid handling

VOLUMETRIC FLASKS - "glass" - "class A" "conformity certified"

VOLUMETRIC FLASKS - "glass" - "class A" "conformity certified" - "COATED"

➤ Manufactured from heat resistant borosilicate 3.3 glass according to DIN EN ISO 1042 standard. Calibrated by automatic robots according to DIN/ISO Class "A" standard.

➤ Conformity mark ("DE-M") and batch number printed on the body surface. Batch certificate can be downloaded from website.

➤ Blue and white colored diamond grinded meniscus ring mark offers longer persistence. Inscriptions on the flask bodies are printed with long lasting enamel color.

➤ Flasks are supplied with a leak-proof P.E stopper which ensures perfect closure.

➤ When handling dangerous and/or valuable solutions coated volumetric flasks are highly recommended.

➤ Bodies of these flasks are coated with a special formulated coating which reduces the impacts and also minimize the possible risks in case of breakage. Coating covers the body like a protective glove and holds the broken parts unscattered.

➤ The coating is highly transparent and can resist up to 135°C with maximum period of 30 minutes. Coated flasks should not be exposed directly to open flame.

➤ All other technical specifications are identical with standard body volumetric flasks.
