

miro-haft/fine *cohesive elastic bandage, fine texture*

miro-haft/fine is a cohesive, conforming fixation bandage with a fine structure which is suitable for universal use. It can be applied without creases (good modelling properties) and does not cause constrictions. It offers good value for money as the bandage only has to be wrapped around a few times. miro-haft/fine adheres to itself but not to the skin or hairs. Bandage clips are not required.

Colour: white

Composition of goods:

polyamide, rayon
microfine latex coating

Order information *single packed*
