RACCOMANDAZIONI PER L'USO

- > I contenitori riempiti con liquido non devono essere sigillati o tappati;
- > Non introdurre oggetti appuntiti, come vetreria rotta, nei sacchi per autoclave;
- > Aggiungere un po' d'acqua ai sacchi contenenti residui solidi. L'acqua vaporizzerà convogliando all'esterno l'aria residua una volta raggiunta la temperatura di sterilizzazione internamente ai sacchi;
- > Non chiudere il sacco, in quanto ciò impedirà all'aria di allontanarsi durante il processo di sterilizzazione;
- > Non sovraccaricare l'autoclave e lasciare uno spazio sufficiente alla circolazione del vapore;
- > Per la decontaminazione ed inattivazione di rifiuti biologici particolarmente resistenti, autoclavare a +134°C

- > Containers filled with liquid, must not be sealed or tapped;
- > Do not introduce sharp objects, such as broken glassware, into the autoclave bags;
- > Add a little high of water into the bags containing solid residues. The water will vaporize channeling outside the residual air once reached the sterilization temperature internally to the bags;
- > Do not close the bag as this will avoid to the air to move out during the sterilization process;
- > Do not overload the autoclave and leave enough space for the steam circulation;
- > For the decontamination and deactivation of biological waste, particularly resistant, to do autoclave process at +134 °C.
