

08.06.2018

To whom it may concern,

Hereby, we would like to confirm that in January 2018 Accent Electronic has finalized the implementation of Identity and Access Management system based on IBM Security Identity Manager solution in the Orange Moldova. IBM Security Identity Manager solution was selected as one of the leader products in IAM market, according to Gartner benchmark .

Within this project, Accent Electronic has demonstrated the professional competencies and flexibility to adapt and overcome blocking points, which were identified during the roll-out and integration into ISIM of the legacy IT sub systems. The system has been successfully implemented within mutually agreed terms, which has enabled Orange Moldova to materialize the benefits of processes automatization and enforcement of IAM controls.

Based on our experience of collaboration, we recommend Accent Electronic S.A. as an integrator of Identity and Access Management solutions and as a trusted partner.

Yours sincerely,

**Victor SAGAI DAC**
