SHANDONG HAI DI KE MEDICAL PRODUCTS CO.,LTD.

山东海迪科医用制品有限公司

Shandong Haidike Medical Products Co., Ltd. is a leading and world famous medical devices manufacturer with CE, ISO, FSC, CFDA and FDA certificates. RTMED has registered as Madrid trademark. We have established good cooperation with Tsinghua University and Shandong Academy of Sciences, having great R & D center and research team. Our products are sold in over 100 countries.

- ◆ Absorbable surgical sutures approved by CE certificate
- ◆ NO.1 catgut suture plant in the world
- ◆ Lifting Threads for Beauty, Cosmetic
- ◆ Orthopedic casting tapes & splints
- ◆ Medical protection products
- ◆ Electric Wheelchair & Manual Wheelchair
- ◆ Pet Food, Vet Suture

Needle Shapes

- Round bodied (heavy)
- ▲ Curved cutting (heavy)
- ▼ Reverse cutting (heavy)
- ⊖ Taper cutting
- ⊖ Microfine spatula curved
- Blunt point
- Straight round bodied
- ▲ Straight curved cutting

Advantages

- 1 Strong Hardness
- 2 Outstanding Sharpness
- 3 Excellent Tenacity And Ductility

PGA POLYGLYCOLIC ACID

Properties:

Structure: Multifilament, Braided
 Colour: Violet, Undyed
 Chemical composition: Polyglycolic acid
 Coating: Polycaprolactone + Calcium Stearate
 Sizes: USP 8/0 - USP 4
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 60 - 90 days

Advantages:

- High initial tensile strength
- Excellent knotting ability
- Reliable absorbability
- Easy to handle
- Outstanding holding power through the critical wound periode
- Smooth surface, slides smoothly through the tissue

PGLA POLYGLACTIN 910

Properties:

Structure: Multifilament, Braided
 Colour: Violet, Undyed
 Chemical composition: Poly(glycolide-co-l-lactide 90/10)
 Coating: Poly(glycolide-co-l-lactide 30/70) + Calcium Stearate
 Sizes: USP 8/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 56 - 70 days

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

PDO POLYDIOXANONE

Properties:

Structure: Monofilament
 Colour: Violet, Undyed
 Chemical composition: Poly (p-dioxanone)
 Sizes: USP 7/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 180 - 210 days

Advantages:

- High initial tensile strength
- Prolonged wound support
- Minimal tissue reaction
- Lower incidence of infection and trauma due to smooth surface

PGCL POLIGLECAPRONE 25

Properties:

Structure: Monofilament
 Colour: Violet, Undyed
 Chemical composition: Poly (glycolide-co-caprolactone)
 Sizes: USP 6/0 - USP 2
 Type of absorption: Hydrolysis
 Sterilization: Ethylene Oxide
 Absorption: 90 - 120 days

Advantages:

- High initial tensile strength
- Easy handling
- Smooth passage through tissue
- Excellent knotting ability

CHROMIC CATGUT

Properties:

Colour: Dark brown
Composition: Purified connective tissue
Sizes: USP 7/0 - USP 4
Type of absorption: Proteolysis
Sterilization: Gamma radiation
Absorption: 90 - 100 days

Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Uniform absorption

PLAIN CATGUT

Properties:

Colour: Beige
Composition: Purified connective tissue
Sizes: USP 7/0 - USP 4
Type of absorption: Proteolysis
Sterilization: Gamma radiation
Absorption: 60 - 70 days

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy knotting and tie down
- Excellent knot security
- Reliable absorbability

SILK

Properties:

Structure: Braided
Colour: Black, White
Composition: Natural silk filaments
Coating: Silicon / wax
Sizes: USP 8/0 - USP 4
Sterilization: Ethylene Oxide

Advantages:

- Excellent handling properties
- High tensile strength
- Highly smooth and flexible
- Good knot security

POLYPROPYLENE

Properties:

Structure: Monofilament
Colour: Blue
Chemical composition: Polypropylene
Sizes: USP 7/0 - USP 3
Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Minimal acute inflammatory reaction in tissues
- Excellent and permanent tissue support

NYLON

Properties:

Structure: Monofilament
 Colour: Blue, Black
 Chemical composition: polyamide 6 - 6.6
 Sizes: USP 12/0 - USP 4
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Smooth tissue passage
- Easy and secure knotting
- Excellent and permanent tissue support

POLYESTER

Properties:

Structure: Braided
 Colour: Green, White
 Chemical composition: Polyethylene terephthalate
 Coating: Silicon
 Sizes: USP 6/0 - USP 4
 Sterilization: Ethylene Oxide

Advantages:

- High tensile strength
- Excellent handling properties
- Minimal tissue reaction
- Good knot security

Lifting Threads Needle

SHARP

Basic type, generally used for linear filling and simple lifting. Beginners can also operate effortlessly.

L TYPE

L type blunt needle, reduce the damage of blood vessels, bruising and hematoma. The pain was significantly reduced.

W TYPE

Circular head, reducing the damage to the skin tissue. After the injection, the needle can be taken out then correct the position and depth of the needle, which improves the lack of a stitch of the other types.

U-COG

Double needle is used for eyebrow lifting and other parts requiring strong lifting. U-COG is a special structure line with strong lifting ability. The local lifting effect is almost as good as the little facelift.

PDO/PCL Lifting Thread

Mono

Needle Sharp Needle
Parts Face, Body
Effects Tightening, Filling, Wrinkles Removing, Whitening

Tornado Screw

Needle Sharp Needle
Parts Eye, Neck, Crow's Feet, Cheek
Effects Tightening, Filling, Whitening, Wrinkles Removing

KONK

Needle L type Blunt Needle
Parts Nasal columella, Nasal bridge
Effects Rhinoplasty, Nose Shaping

COG Lifting

Needle L/W type Blunt Needle
Parts Lifting Eyebrow, Apple Zone, Cheek, Chest
Effects Face Lifting, V Face, Chest Lifting

Multi Threads

Needle L type Blunt Needle
Parts Face, Neck, Eye Bag, Crow's Feet
Effects Tightening, Filling, Whitening, Wrinkles Removing

Molding COG

Needle W type Blunt Needle
Parts Face, Neck, Crow's Feet, Eye Bag
Effects Tightening, Filling, Whitening, Wrinkles Removing

Medical Cooling Gel Patch

Usage Method

Step one:
Thoroughly clean facial skin before using facial mask.

Step two:
Remove the facial mask, spread it on the face and adjust it to the skin.

Step three:
Apply for 15-20 minutes, so that the skin can absorb the essence of the facial mask.

Step four:
Remove the facial mask, gently massage the face with the fingers, absorb the residual essence, and clean the face.

Hyaluronic Acid Hydrating Mask

Net : 25ml
Silk membrane cloth

Peptide Repair Lyophilized Powder

- ① Peptide element repair lyophilized powder
② Peptide element repairing solvent

Step one:
Open the aluminum cover and rubber plug.

Step two:
Pour bottle ② of liquid into bottle ①.

Step three:
Put on the dropper and shake the liquid in bottle ① evenly.

Step four:
Squeeze the dropper, take a proper amount of liquid and evenly smear it on the face.

Hernia Repair Mesh

Large mesh aperture

Promotes liquid circulation and smoothes tissue growth.

Less micropores

Greatly reduces the possibility of bacteria hiding and is not easy to infect.

Light weight

Reduce postoperative pain and foreign body sensation.

Hernia Example

After Mesh Repair

Disposable Surgical Face Masks

3 Ply Flat type Ear Loop EN 14683:2019 Type IIR

Name	Parameter
Size	17.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 98%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

3 Ply Flat type Ear Loop EN 14683:2019 Type IIR

Name	Parameter
Size	14.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 98%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

Disposable Medical Face Mask

3 Ply Flat type Ear Loop EN 14683:2019 Type I	
Name	Parameter
Size	17.5 cm x 9.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, metal wire with plastic covering nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 95%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

3 Ply Cup type Head Loop EN 14683:2019 Type IIR

Name	Parameter
Size	13.5 cm x 13.5 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 98%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	2 years after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

5 Ply Folding type Head Loop N95-V1

Name	Parameter
Size	11.5 cm x 15 cm
Material	Polypropylene spunbond nonwoven fabric, polypropylene melt-blown nonwoven, nose clip, polyester/nylon spandex blend ear loops
Product performance:	The bacterial filtration efficiency of the mask should be not less than 95%.
Application	It is worn by clinical staff during non-invasive procedures, covering the user's mouth, nose, and jaw, providing a certain physical barrier to prevent direct penetration of pathogenic microorganisms, particulate matter, in patients, etc.
Expiration date	11 months after production
Storage	Store at room temperature, the relative humidity should not exceed 80%, non-corrosive gas and well-ventilated room. Transportation means should be clean and isolated from fire sources.

Medical Goggle

Model specifications

□White □Black □Transparent
□Large □Medium □Small

Product description

It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.

Expiration date

3 years after production

Storage

This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Isolation Mask

Model: Ear hook type / Headband type

EN166:2001
EN167:2002

Product description

It is composed of a protective cover made of polymer material, a foam strip and a fixing device. Non-sterile, single use.

Expiration date

3 years after production

Storage

This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Isolation Gown

Isolation Gown - TYPE A

Isolation gowns - type A Specifications: 120cm×120cm

Material 100% Non-woven fabric

Product description Non-woven fabrics are usually used as the main raw materials, which are made by cutting and sewing. Non-sterile, single-use.

Expiration date 3 years after production

Storage This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Isolation Gown

- Good air permeability
- Strong barrier performance
- Non-sterile
- Do not reuse

100% Non-woven fabric

zipper

Elastic cuffs

Isolation Gown - TYPE B

Isolation gowns - type B Specifications: One-size-fits-all

Material 100% Non-woven fabric

Product description Non-woven fabrics are usually used as the main raw materials, which are made by cutting and sewing. Non-sterile, single-use.

Expiration date 3 years after production

Storage This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Disposable Protective Clothing

Executive Standard: GB 19082-2009 EN 14126:2003

Specifications: One-piece Sizes: □ 160 □ 165 □ 170 □ 175 □ 180 □ 185

Raw materials of Components:

Items No.	Components	Raw materials
1	Fabrics	PP+PE (Polypropylene + polyethylene breathable membrane) composite material
2	Rubber strip	EVA low temperature glue, polymer basic cloth

Intended use: It is used to provide barrier and protection for the potentially infectious patients' blood, body fluids, secretions, etc. that clinical medical personnel come into contact with at work. It cannot be used to isolate places with strict microbiological index control requirements such as intensive care unit (room).

Expiration date 2 years after production

Storage: Store at room temperature, in non-corrosive gas, dry, avoid the sunlight, good ventilation, clean environment, away from fire.

WWW.HDKSUTURE.COM

Surgical Gowns

BS EN 13795-1:2019

Model: □ S □ M □ L □ XL □ XXL □ XXXL □ XXXXL

Specifications: □ High performance type □ Standard type

Material 100% Non-woven fabric

Intended use For the surgical staff to wear, reduce the source of infection to the patient's surgical wound to prevent postoperative wound infection.

Expiration date 3 years after production

Storage Store in an environment with relative humidity not exceeding 80%, no corrosive gas, cool, dry, well ventilated and clean.

WWW.SUTURESCHN.COM

Medical Isolation Shoe Cover

size: ☐Long ☐Short Style: ☐Non-woven fabric ☐PVC ☐PP+PE

Product description	Made of suitable materials, with sufficient strength and barrier properties. Non sterile.
Expiration date	3 years after production
Storage	Store in an environment with relative humidity not exceeding 80%, no corrosive gas, cool, dry, well ventilated and clean.
Medical isolation shoe cover	Long-style / Short-style Blue / White FZ/T64005-2011

Medical Cap

Model specifications Round cap. ϕ 25.5cm FZ/T64005-2011

Product description Non-woven fabric is usually used as the main raw material, which is made by cutting and sewing. Non-sterile, single-use.

Material ☐Non-woven fabric ☐PP+PE

Colour Blue

Storage This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Medical Scrubs Uniforms

Model: type A: split type; type B: gown type.

Specifications ☐S ☐M ☐L ☐XL ☐XXL

Product Description Usually made of cotton fiber or non-woven fabric. The medical scrubs uniforms is short-sleeve or long-sleeve style that have the function of blocking dandruff, and do not have liquid barrier properties. It is non-sterile supply and can be reused. It should be sterilized before using.

Expiration date 3 years after production

Storage The product should be stored in a clean warehouse without corrosive gas, well ventilated, cool and dry.

Medical Bed Sheet

Materials: 70% Polypropylene, 30% Polyethylene non-woven fabric

Product description	It is made by compounding or sewing non-woven fabric and plastic film. Non-sterile, single use.
Expiration date	3 years after production
Storage	This product should be stored in a dry, ventilated, non-corrosive gas warehouse.

Disposable Virus Specimen Collection Tube

Disposable sampler

Model: Inactivated and non-inactivated

Product description	Disposable virus specimen collection tube is composed of swabs and/or collection cups and tubes containing storage solution. Non-sterile.
Expiration date	12 months
Storage	The product should be stored in a non-corrosive gas and well-ventilated warehouse at room temperature.

Medical examination gloves

Model/Specification: According to the different materials used, it is divided into: polyvinyl chloride, butyronitrile; according to the size, it is divided into: XS, S, M, L, XL.

Product Description: Usually made of materials such as polyvinyl chloride. Have sufficient strength and barrier properties. Non-sterile supply, single use.

Intended use: It will be wore by doctor to do checking for the patients or lab testing.

Medical rubber gloves

Model/Specification: XS, S, M, L, XL.

Product Description: Usually made of materials such as polyvinyl chloride and rubber. Have sufficient strength and barrier properties. Non-sterile supply, single use.

Intended use: It will be wore by doctor to do checking for the patients or lab testing.

Orthopedic Casting Tape

USE INSTRUCTION

- Apply 1~2 layers stockinet over the affected body part;
- Wear surgical gloves;
- Choose proper size orthopedic casting tape, then open the package;
- Immerse the casting tape in normal temperature (20℃~30℃) water for 5~6 seconds and squeeze 2~3 times. Then remove from the water and squeeze out the excess water. The curing time of orthopedic casting tape is directly related to the temperature of water. The curing time is shorter in high temperature water than in low temperature water. If the water temperature is over 27℃, the curing time is too short to increase the difficulty of the operation.
- Wrap the casting tape spirally around the affected body part, overlapping the previous layer by one-half or two-thirds the width of the tape. The tension is moderate. If it is too loose, it will weaken the adhesion of the orthopedic casting tape. If it is too tight, it will affect the blood circulation.
- The intensity of the casting tape is related to the number of overlapped layers. Overlap 3~4 layers for the non-weight bearing parts, while overlap 5~6 layers for the weight bearing parts. If more layers are needed, please ensure the adhesivity between the layers.
- To increase the adhesion between layers, the casting tape will be shaped after wrapped. The operating time should be in 3~5 minutes. The adhesion and shaping effect cannot reach the best if the operating time is longer or the immersed time is too long. The patients do not allow to move freely in 10 minutes before the orthopedic casting tape are completely hardened.
- The electric plaster saw is needed if the affected parts need to open a window or remove the orthopedic casting tape.

Orthopedic Casting Tape				
Product Description	Sizes	Specification(W×L)	Packaging	Operating Part
Fiberglass Orthopedic Casting Tape	RT002	5.0cm × 360cm	10bags/box 12boxes/ctn	Wrists/Childrens

Tie-rod brake design

Comfortable seat

Wear-resistant reinforced brake rear wheel

New Generation Multi-claw Crutches

Material upgrade

Smooth all the way

- Anti-stumbling design
- Steady walk without hindrance
- The inside and outside width design is balanced and stable.

Feel comfortable

- High wear-resistant handrail
- Surface cracked anti-skid treatment, anti-skid and wear-resistant. Ergonomic design. Fits to the hand without getting tired from holding for a long time.

Firmer and stronger

- 1.2mm wall thickness Thicken reinforcement
- Lightweight and load-bearing

Firm and convenient

- Annular clavicle clamp
- Fixed main pole Three simple steps

Medical Grade Crutches

Stable and non-slip height adjustable

PE environmentally friendly foam material arm rest

Thick PE foam material, high resilience, non-slip, soft and comfortable, strong abrasion resistance, not tired after long-term use.

Leg height adjustment in 9 positions

The height of 9 levels is adjustable to meet the needs of people of different heights. Strengthen the aluminum alloy to provide super good support.

Two-way marbles

Grip three-position adjustment

The grip has three gears adjustment, the adjustment part is locked firmly and stably, and it is convenient to use and feel comfortable and soft

Adjusting screw

Non-slip durable rubber pad
