

TRACHEOSTOMY TUBE KITS

Features

- Ergonomic design provides secure positioning and minimizes tube movement
- Tapered arc tip is designed to help placement and removal of both the tracheostomy tube and inner cannula with minimal disruption to the patient's airway.
- Permanently attached 15mm connector on the tube that assist connection to anesthetic and ventilator breathing circuits.
- Radiopaque material making the tube entirely x-ray visible for correct tube positioning

Individual package

Single	Double	Triple	Size
41.07.11001	41.07.22001	41.07.32001	7.0
41.07.11002	41.07.22002	41.07.32002	7.5
41.07.11003	41.07.22003	41.07.32003	8.0
41.07.11004	41.07.22004	41.07.32004	8.5
41.07.11005	41.07.22005		9.0

Complex Kit

Single	Double	Triple	Size
41.07.14001	41.07.20005	41.07.33001	7.0
41.07.14002	41.07.20006	41.07.33002	7.5
41.07.14003	41.07.20007	41.07.33003	8.0
