LW-25 Pelvic Acetabular Plates Set

ACETABULAR PLATES*

Quadrilateral Surface Plate is designed to buttress the medial wall of the acetabulum. Posterior wall acetabular plate is precontoured distally to match the curvature of the ischial tuberosity.

The proximal end of the plate is left uncountoured with the proximal holes grouped together for optimized bone purchase away from the acetabular joint.

Indications: The fractures of pelvis and acetabulum. Posterior wall fractures, posterior column fractures, transverse and T-type fractures and quadrilateral surface comminution associated with acetabular fracture.

Plate Profile: 2.5mm profile and locking, straight, curved or also shaped. Compatible with the contours and curves of all pelvic bones surfaces.
