

# Matrice 300 - Dual Gimbal Connector (Part No.10)

## DESCRIPTION

The DJI Matrice 300 Dual Downward Gimbal Connector is a payload mount that allows for two cameras / payloads to be mounted on the underside of the DJI Matrice 300 RTK. The connector adds IP44 water and dust resistance provided the payload is also water and dust resistant. With DJI's Matrice 300 Series Dual Gimbal Connector you can attach two camera or sensor payloads under your drone. This accessory allows the Matrice 300 RTK to carry three gimbals simultaneously. DJI dual gimbal connectors are IP45 rated - meaning they're waterproof. This dual gimbal connector has two gimbal cables for each gimbal port and you can connect them to connectors under the Matrice 300. The Zenmuse H20 / H20T / XT2 and Z30 gimbals will fit this dual gimbal connector. It'll also work with other third-party DJI PSDK payloads. If you're using the XT2 you can only mount it on the first gimbal port and if you're mounting three payloads the Matrice 300 RTK will accept the gimbals above. Get a broader view from your payloads with the Matrice 300 Series Dual Gimbal Connector.

## FEATURES

The DJI Matrice 300 RTK Dual Downward Gimbal Connector enables mounting of dual camera/sensor payloads to underside of the airframe. Compatible payloads include Zenmuse H20 / H20T / XT2 / Z30 and other third party approved DJI PSDK payloads. Note that the XT2 can only be mounted on the first gimbal port. This mount has an IP45 waterproof rating.

## PACKAGING

Package Weight

1.055 lb (0,479 kg)

Box Dimensions (LxWxH)

14.2 x 7.6 x 3.7" (36,07 x 19,30 x 9,40 cm)
