ANESTHESIA MASKS AND ACCESSORIES

SILICONE MASKS

Silicone masks are made of medical grade silicone because this is generally considered the material of choice for its superior ability to conform to the patient's facial anatomy. The field of application includes anesthesia and mask ventilation for pediatric and adult patients. The masks are available in various shapes and sizes.

The smaller sizes have a rather round shape in order to provide comfortable fit and effective seal for the faces of infants.

The bigger sizes have an anatomically formed teardrop shape to ensure convenient fit and seal for facial contours of adult patients.

Silicone masks have a flexible, soft and transparent mask body.

The mask body design provides a comfortable grip. Shape and material allow for safe handling by doctors and nurses.

The silicone masks are reusable.

| | | |
|---|---|---------|
| A | ① Silicone mask, reusable, size 00, premature baby | MP02900 |
| | ② Silicone mask, reusable, size 0, small neonate | MP01910 |
| | ③ Silicone mask, reusable, size 1, large neonate | MP01911 |
| | ④ Silicone mask, reusable, size 2, small child | MP01912 |
| | ⑤ Silicone mask, reusable, size 3, large child | MP01913 |
| | ⑥ Silicone mask, reusable, size 4, small adult | MP01914 |
| | ⑦ Silicone mask, reusable, size 5, large adult | MP01915 |
| B | ① Hook ring for silicone masks, reusable, 15 mm OD, for sizes 00 – 1, 10 pcs. | MP01916 |
| | ② Hook ring for silicone masks, reusable, 22 mm ID, for sizes 2 – 5, 10 pcs. | MP01917 |

Additional mask accessories, e. g. reusable hook rings as well as headgears are available for fixation (cf. accessories for anesthesia masks).

Not all products, features, or services are for sale in all countries.

Silicone Masks Consumables and Accessories

Making hospital stays as comfortable as possible for patients is our common goal. To effectively enhance patient comfort our silicone masks are made of medical grade silicone that has superior ability to conform to the patient's anatomy.

Benefits

Silicone Masks

The medical grade silicone is resistant to high or low temperature and durable. Our silicone masks can be autoclaved and thus, they can be reused on multiple patients.

There are different mask designs available. The smaller sizes (sizes 00-2) have a rather round shape in order to provide a comfortable fit and an effective seal for infants with more round shaped face contours. The bigger sizes (sizes 3-5) have an anatomically formed teardrop shape to ensure a convenient fit and seal to more adult patients' facial characteristics. The silicone masks have a flexible, soft, and transparent mask body.

The mask body design allows for a comfortable rest of the thumb. The form and material create an easy grip for the physician. The transparent mask body allows for continuous visual observation of the patient's condition.

Easy application is supported through additional mask accessories such as hook rings and headgears for fixation. Two different headgears in small and large designs offer patients and physicians a soft and elastic support and holding position.
