New Hospivac 350

Operating Theatre suction units

MAIN APPLICATIONS

Emergency Dept.

Operating Theatre

General Surgery

Neurosurgery

Obstetrics

Dental Practice

NEW HOSPIVAC 350 has been designed for professional aspiration of bodily fluids, gases, tissues or bones of the patient during or after surgery. The state-of-the-art oilless pump guarantees high performances with

excellent suction capacities and max vacuum reachable within a few seconds, with no need for maintenance.
A clear dashboard along with a full range of accessories makes it the ideal device for surgical suction and liposuction.

Jars in APEC® autoclavable up to 143°C available upon request

INCLUDED ACCESSORIES

Liquid Collection Jars with overflow valve system (different options, see below)
 8x14 Silicone Tubes (autoclavable) + Conical Connector ø 10-11-12mm
 Antibacterial and Hydrophobic Filter (single-patient)

FEATURES

- Motor
- Power Feeding
- ISO 10079-1 Classification
- Max free air flow rate
- Max Vacuum (adjustable)
- Noise level

Power consumption	230 VA
Fuse	1 x F 4 A 250 V
Duty cycle	Non-stop operation
Weight	13 Kg
Size	46x85x42 cm
Years of Warranty	2
Place of Manufacturing	ITALY

Superior colour rendition

With outstanding colour rendering indexes R_a = 95 the surgeon recognizes clearly the tiniest nuances of colour in tissue.

The colour spectrum of the wound is rendered naturally with rich contrast. The OT-light clearly provides welcome relief for your eyes.

Facetted multi-lens system

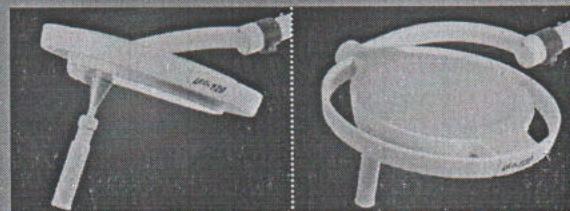

A multitude of computer-calculated facetted lenses guarantees homogeneity and lowest shadiness in the light field. Separately arranged optical systems, each with one LED module, generate their own light field, which increases the contrast effect of the OT-light. Light intensities of 50.000 Lux can be attained without difficulty.

Key pad on the lamp housing

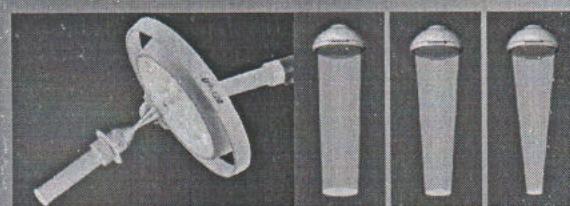

The following light functions can be adjusted electronically, such as:

- Switching ON and OFF
- Electronic light intensity control

Handling

During development high attention was paid to easy handling and high ease of maintenance. Furthermore the flow-enhancing ring form and the minimal surface avoid any heat increase in the surgeon's head area and create a perfect laminar flow performance. The light can be positioned exactly to the wound field with the handle.

Focusing (optional)

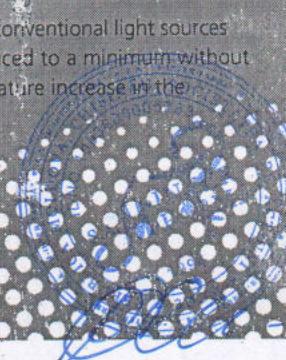

The light field can be focused by turning the handle (pictured sterilisable handle available as an option against surcharge). The focussable light beam allows a punctual illumination of deepest wound channels with light intensity and a exact matching of the light field diameter with the size of the wound field.

Long life-span/low power consumption

The life-span of more than 60.000 operating hours reduces the costs for exchanging and replacing the illuminants considerably, compared with the conventional halogen technology used with former OT-lights. By implementation of the LED technology the power consumption could be reduced partially with more than 50%.

Cool light

The LED technology is much more effective than conventional light sources such as halogen bulbs. The heat radiation is reduced to a minimum without using any expensive filter technique. The temperature increase in the surgeon's head area is almost nonexistent.

Dual-function UV-C flow germicidal lamps

2-function flow germicidal lamps with an external radiator of direct action guarantee a full range of disinfectant action. It gives a possibility of intensive disinfection of the air in the presence of people (UV-C flow chamber – **function I**) and direct disinfection of the whole room when the personell and patients stay outside the room (UV-C direct radiation tube – **function II**). Disinfectant action of the external radiator is similar to standard germicidal lamps NBV series. UV-C radiation disinfects the air and surfaces in the room (walls, table tops, objects, etc.) Thanks to its nature it also reaches different nooks as reflected light.

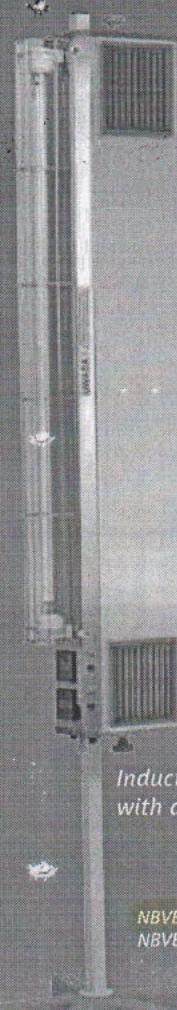

Both functions are independent of each other.

K040 / E Intensive Care Trolley

K040 / E

Kenmak

Kenmak Hospital Furnitures LTD.

- The whole trolley is including 5 layers of drawers, 2 small size, 2 medium size, 1 large size.
- Drawer mainly consists of bottom panel board, frame and size adjustable plastic medicine tray.
- Inner part is made of steel.
- Trolley has stainless steel top plate.
- It is matched with CPR board, oxygen cylinder holder and needle disposal bottle.
- Besides, trolley includes 2pcs garbage bins, 1 pc transparent file box, 1 pc sliding side board, 1 pc metal salver for monitor/computer and 1 pc I.V. Pole.
