Delivery date:
26.10.2022

The test results relate only to the samples stated in the test report. The test report may be reproduced only as a whole, in parts only upon written permission of the laboratory. In case that the laboratory is not responsible for sampling, the results concern the samples as they have been received. The laboratory does not take any guarantee for the identity of the samples not taken by the lab personnel. The client is responsible for the information provided about the samples.

Description: *Testing the efficacy of chemical disinfectants and antiseptics*

Sample ID:	S19/2022	Sampling date:	26.1.2022
Sample name:	F3320	Sample delivered:	27.1.2022
Sampled:	Client	Testing date:	14.7. - 26.7.2022
Sampling point:	SODEL	Delivered amount:	4x250 ml
Client:	SODEL	Page:	2

Subject of testing:
Surgical handwash - 3 h effect

Identification of the sample:

Name of the product:	F3320
Batch number (Lot):	RDO224E17
Date of manufacture:	25/01/2022
Expiry date:	01/2024
Manufacturer:	SODEL, 190 rue René Barthélemy, Lisieux, France
Incoming date:	27.1.2022
Storage conditions:	room temperature, dark area
Active ingredients:	CAS: 18472-51-0 Chlorhexidine gluconate 4.0%

Experimental conditions: **Testing of disinfecting efficiency of chemical disinfecting and antiseptic agents on carriers**

	SOP-M-19-00 (EN 12791:2016+A1:2017)
Effect:	3 h effect
Period of analysis:	14.07.2022 - 26.07.2022
Test temperature:	20°C ± 1°C
Test method:	dilution neutralization method
Appearance of the product:	pink gel
Test concentration:	100%
The volume of the product:	2 x 3 ml
The application time:	2 x 2,5 min
Procedure:	handwash
Rinsing tap water:	10 s
The soap:	soft soap from linseed oil
Reference item:	CAS 71-23-8 1-propanol p.a., 60% (V/V) batch number: K52972497115, expiry date: 31.12.2025
The volume of the reference propan-1-ol used per person:	2 x 3 ml, according to reference surgical hand disinfection procedure, the total application volume is 6 ml
The application time:	2 x 1.5 min, according to reference surgical hand disinfection procedure, the total application time is 3 min
Neutralization medium:	Dey-Engley Neutralizing Broth M 1062
Surgical hand disinfection procedure	with product: handwash procedure, 3h effect
Requirements:	The mean reduction for 3-hour effect of a product shall at least be not inferior to that achieved by a specified reference product (60% volume concentration of propan-1-ol). To demonstrate additionally a "sustained effect", the mean reduction for the 3 h effect of a product shall be superior to that achieved by the reference product.

Test procedure:

1. Determination of the presence of microorganisms in the product
2. Determination of the prevalue - number of cfu sampled immediately before treatment from the hand
3. Determination of the postvalue - number of cfu sampled after treatment from the hand after wearing surgical gloves for 3 h following disinfection
4. Expression and interpretation of results - reduction factor - ratio of prevalue and postvalue, generally expressed by decimal logarithms

The standard:

EN 12791:2016+A1:2017 Chemical disinfectants and antiseptics – Surgical hand disinfection - Test method and requirements (phase 2/step 2), November 2017

Note: V_c = value is the number of cfu per ml, Φ = average V_{c1} a V_{c2} (1. + 2. duplicate V_c values), N = the number of cfu/ml of the bacterial test suspension, N_{v0} = the number of cfu/ml of the bacterial test suspension at the beginning of the contact time = 0, C = the number of surviving bacteria per ml in control tests

Acceptance criteria for test results:

Only if the results of the test procedure fulfil the following requirements, they shall be accepted for further evaluation, otherwise the test shall be repeated:

- A complete set of results from at least 23, but maximum 28 volunteers shall be available. All complete sets of results shall be used for further evaluation.
- The overall means of the lg prevalues for RP and PP shall be both at least 3,50.
- The absolute difference of mean differences between lg reductions of RP and PP of group RP → PP and group PP → RP shall be less than 2,00
- All quotients of weighted mean counts between 5 and 15.

Performed by: Mgr. Alena Holíková, Lab Technician

Description: *Testing the efficacy of chemical disinfectants and antiseptics*

Sample ID:	S19/2022	Sampling date:	26.1.2022
Sample name:	F3320	Sample delivered:	27.1.2022
Sampled:	Client	Testing date:	14.7. - 26.7.2022
Sampling point:	SODEL	Delivered amount:	4x250 ml
Client:	SODEL	Page:	5

Conclusion:

The acceptance criteria for the test results were met.

For 3 h effect - From table in EN 12791:2016+A1:2017 of critical values for Wilcoxon's matched-pairs signed-ranks test the entry for $n = 24$ and a one sided 0,025 level of significance, the critical value of 81 is found. Hence $c = 81 + 1 = 82$. The pairwise differences are sorted in descending order. **The 82nd value is -0,31**. Hence the Hodges-Lehmann upper one sided 97,5% confidence limit for the difference in lg Rs between RP and PP is -0,31, which is less than the agreed inferiority margin of 0,85. Therefore the hypothesis of inferiority of PP is rejected and it can be concluded that the test preparation PP is non-inferior to RP.

For "sustained effect"-From table in EN 12791:2016+A1:2017 of critical values for Wilcoxon's matched-pairs signed-ranks test the entry for $n = 24$ and a one sided $P = 0,01$ level of significance, the critical value of 69 is found. Hence $c = 69 + 1 = 70$. The pairwise differences are sorted in descending order. **The 70th value is -0,23**. Hence the Hodges-Lehmann upper one sided 97,5% confidence limit for the difference in lg Rs between RP and PP is -0,23, which is less than the agreed inferiority margin of 0,85. Therefore the hypothesis of inferiority of PP is rejected and it can be concluded that the test preparation PP is non-inferior to RP.

The tested product: **F3320**
Batch number: RDO224E17
Standard: EN 12791:2016+A1:2017
Test method: dilution neutralization method
Effect: 3 h effect
Procedure: handwash

Conditions:

Application time: 2 x 2,5 min
Volume of the product: 2 x 3 ml
Concentration: 100%

The tested product is suitable to be used as surgical hand disinfection.
