

C-PEEP™ valves

[Home](#) > [Intersurgical products](#) > [Critical Care](#) > [Patient InterFace](#) > [CPAP Devices and Systems](#) > [CPAP masks, breathing systems and C-PEEP™ valves](#)

This range includes seven fixed value PEEP valves ranging from 2.5 to 20cm H₂O. Each valve is colour coded in line with similar products found in the market.

Intersurgical valves are 100% tested and individually identified with a code on the valve itself, so that performance data is available for future reference. The transparent body design, coupled with the coloured internal components, allow for easy blockage assessment and monitoring of patient's respiratory rate. Within the lightweight, robust L-shaped design we also feature an internal disc valve to satisfy the patient if the peak flow requirement exceeds the set flow.
