

To: To whom it may concern

Subject: Recommendation letter

This letter represents a personal recommendation for AM Sisteme SRL. I had the pleasure to work with AM Sisteme SRL, under the project "Modernisation of Local Public Services" funded by European Union implemented by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH in the Republic of Moldova:

- Improving water supply services in the city of Edinet
- Increasing the energy efficiency of the building of the Theoretical High School "Ion Vatamanu" from Straseni

The project consisted in full rehabilitation of water supply services in the city Edinet including earthworks, pipelines removals and installation of new pipes, mounting of new hydrants, individual connections of households to the new systems and roads rehabilitation, on one hand and full thermal rehabilitation of the Ion Vatamanu lyceum building envelope from Straseni municipality, including replacement of internal electrical, water supply, sewerage and heating systems, building of a new ventilation system, mounting and connection of photovoltaic panels, delivery and installation of new kitchen equipment.

During the project execution, AM Sisteme SRL and its associates has shown a good organization of work processes with increased efficiency and a high quality of performed works. The company has the technical and material basis, equipment and machines, and professional teams, through which the company provided ongoing support and openness in determining optimal solutions on engineering systems and equipment installation. In conclusion of outlined above, I can certainly recommend AM Sisteme SRL for any organization that will establish collaboration with it in the future.

Respectfully,

Adrian Stranzenbach
