

Care Aids

Fixation Plasters

Cannula Fixation Dressing, non-woven material

Breathable sterile fixation plaster for secure fixation of I.V. cannulas in veins. The absorbing pillows (2 x 2,2 cm) guarantee effective absorption along the cannula. The I.V. point of puncture is optimally protected against infections. A plaster pillow enclosed decreases pressure from the cannula. The plaster is air- and watertight.

Waterproof: No

Kind of adhesive: Acrylate adhesive

Material 100 % Polyester (non-woven)

(adhesive structural):

Material 90 % Viscose, 10 % Polypropylene
(absorbent pad): with polyethylene coating

Material One-sided silicone coating

(protective paper):

Sterile: Yes

Cannula Fixation Dressing, transparent

Transparent, sterile fixation dressing for secure fixation of I.V. cannulas in veins. The absorbing pillows (2 x 2 cm) guarantee effective absorption along the cannula. The I.V. point of puncture is optimally protected against infections. A dressing pillow enclosed decreases pressure from the cannula. The plaster is airtight.

Waterproof: Yes

Kind of adhesive: Acrylate

Material Coated paper

(adhesive structural):

Material 85 % Viscose; 15 % ESC (Ethylene-propylene) next to each other
(absorbent pad):

Material PU

(protective paper):

Sterile: Yes
