### Regarding the miscibility of NYTRO® 11GX and NYTRO® LYRA X

Provided that both oils are in a condition that is fit for purpose, the transformer oils NYTRO® 11GX and NYTRO® LYRA X are miscible and compatible i.e. they can be mixed in any proportion and will form a fully inhibited transformer oil.

Both NYTRO® 11GX and NYTRO® LYRA X are naphthenic based fully inhibited transformer mineral oils which, when unused, fully conform to the specification for Type A fully inhibited high grade (TVAI) transformer oils in IEC 60296 Ed.5 (2020).

Sincerely,

Robert Fairholm  
Development Engineer
