

Disposable Endoscopic linear cutting stapler and accessories

Indication

1. Suitable for open or endoscopic surgery
2. Resection, transection and stapling of lung, bronchial tissue, stomach and intestine.

Characters

- ❖ Strengthened anvil, better grip power; slim shape, stronger passability.
- ❖ The stepped staple cartridge is gradually clamped, making it easier to press the tissue to the desired height.
- ❖ High and low staples, adapt to the natural state of the organization; tight inside and loose outside, reducing the occurrence of anastomotic leakage.
- ❖ The drop-shaped slot design makes it easier to molding.
- ❖ 11 angle adjustments, maximum 45° on each side.
- ❖ The new enlarged unloading button design makes the operation more convenient.
- ❖ Ring handle, one-handed operation; control jaws to clamp and release tissue.
