- Define project scope, objectives, staffing, resources, and deliverables;
- Develop project plans that identify key issues, approaches and performance metrics;
- Plan and schedule project timelines and milestones;
- Formulate risk management plans;
- Assemble and coordinate multi-disciplinary project teams;
- Lead and mentor up to 35 project staff;
- Manage vendor relationships including negotiating and controlling contracts;

Main Projects:

- **Babaliste**

Babaliste is the new way to buy and sell your new or used items across categories like fashion, furniture, electronics, clothing, cars, jewelry, makeup, and recreation. You can post your ad easily for free, browse through thousands of goods and make offers to sellers. The platform is a high load system deployed by EBS across the web and mobile platforms.

iOS: <https://play.google.com/store/apps/details?id=ma.babaliste>

Android:<https://itunes.apple.com/us/app/babaliste-vendre-et-acheter/id1228061204?ls=1&mt=8>

Used Technology: Android Studio, Java, Swift4

- **Hastnet Web**

The biggest animal (horse) marketplace in Sweeden

URL:<https://hastnet.se/>

Used Technology: Node JS, React JS, Mongo, Redis, My Sql, RabiMQ.

- **Donate Smarter**

Donate Smarter is an easy-to-use fundraising system developed for donors, NGOs and individuals that are willing to contribute to charities in a transparent way. The system allows tracking the impact generated by each contribution and facilitates charities to access to various donations, with little or near-to zero paperwork.

URL: <http://www.donatesmarter.com>

Used Technology: Codeigniter (PHP), HTML5, CSS3

- **BPappz**

With Truth Seeker users can get notifications of new episodes for their favorite podcasts, as well as download content automatically so they can listen to them offline. The app makes use of a Google Cast feature delivering live audio/video streaming on end-user devices. The App serves as a convergent media consumption venue for discerning news junkies that don't buy the line fed by mainstream media.

Used Technology: Android Studio, Java, ObjectiveC, RESTful web services

- **AMJTEM NGO**

Official Alert is an app developed for journalists that screens all of the alerts from public authorities and governmental agencies. The application contributes to public service awareness and is available for everyone to download. As of today, the app gathers info from over 700 Public Resources.

Used Technology: Android Studio, Java, Swift3

- **Swap Services Oy**

Swap.com is a platform for buying and selling pre-owned items. This portfolio entry refers to refactoring of they're both, android and iOS applications, which handle over 10K users on a daily basis. At the moment both apps are handled by EBS, within a continuous development cycle, to supply new features and improvements "on-the-fly".

Used Technology: Swift 4, Android Studio, Java

- **NFO Ltd**

Tidy is an app that allows both: android and iOS users to organize their phone gallery items (music, photos, and other media content) in an easy and intuitive way. The application focuses on a gamification structure that allows users to enjoy the process of organizing their items instead of fighting with clutter.

Used Technology: Android Studio, Java, Swift
