## STENT

### DOUBLE J STENT / URETERAL STENT

- The Aster Double J Stent is a flexible tube made from biocompatible material, inserted via retrograde or antegrade methods. It ensures continuous urine flow from Kidney to the bladder during ureteral obstruction and Blockage. It is designed for Short-term use up to 30 days. the stent has optimal radiopacity for imaging, high memory retention for reduces the migration and it includes a pusher for easy insertion.
- Double J Stent Set contains Suture, Guidewire and Clamp
