

Thrombus management

Cragg-McNamara™
Valved Infusion Catheter

Cragg-McNamara™

Valved Infusion Catheters

The Cragg-McNamara™ Valved Infusion Catheter is a single lumen infusion catheter with a valved tip that allows infusion without the need of a tip-occluding guidewire.

Large infusion lumen

Only 5 F Cragg-McNamara™ catheters give you the option to infuse without a guidewire in place, nearly doubling the infusion lumen area.

Streamlined patient care

Infuse overnight, without a guidewire in place which eliminates the risk of guidewire movement for simplified patient care.

Treat without a tip-occluding guidewire and sidearm adapter, which may contribute to cost savings.

Order information

Product catalogue number (1/box)	Diameter (F)	Usable length (cm)	Infusion length (cm)	Recommended guidewire (inch)
