

MAGLUMI® X6

Fully-auto Chemiluminescence Immunoassay Analyzer

Flexible CLIA Solution
For Medium/High-volume Laboratory

Innovation Brings Revolution

CORE TECHNOLOGY – X-TECH

**Patented Pipetting
Technology**

**Accurate Incubation
Technology**

**Intelligent Washing
Technology**

**High-efficiency
Loading Design**

**Stable and Precise
Measuring Technology**

**Pioneer in Optional
Wash Liquid Preparation**

**User-friendly with Easy-operation
and Real-time Display**

**Multiple Expansion
Solutions**

MAGLUMI® X6

Based on X-Tech, gives you more possibility

- Throughput: 450 T/H
- Throughput per unit area: up to 320 T/H/m²
- On board capability: 112/412 samples
- Reagent position: 30
- Walk-away tests: up to 2000 tests
- Cuvettes loading in one time: up to 2002

Functional Modules

Advanced Technology

Patented Pipetting Technology

- A revolutionary sample pipetting volume from 10 to 280 μL
- Disposable filtered Tips avoid aerosol pollution, ensuring no cross-contamination during the test
- Higher pipetting accuracy with low pipetting CV
- One pipetting for multiple tests to save cost

Accurate Incubation Technology

- Single cuvette with five-sided heating at 37°C, ensuring accurate, quick and uniform incubation
- Incubating 243 cuvettes simultaneously
- Non-contact mixing with different modes before incubation, ensuring sufficient reaction

Intelligent Washing Technology

- Magnetic separation washing with 4-group independent units and non-contact vortex mixing can reduce non-specific binding
- Different mixing modes depending on different assays, ensuring thorough washing to improve sensitivity

Stable and Precise Measuring Technology

- PMT with heating and cooling function, ensuring the detection precision
- Independent measuring room, avoiding light cross-contamination

Multiple Expansion Solution

- 112 sample positions, up to 412 sample positions with expansion[▲]
- Capable to link with laboratory automation system
- Multiple X6 units can be connected[▲]

▲ Expansion of X6 is available soon

Pioneer in Optional Wash Liquid Preparation

*Two modes: Automatic or Manual

- Select automatic mode on the software and connect X6 to the water purification system, easing your operational burden
- If water purification system is not available, the preparation can be done by manually mixing the wash concentrate with pure water

User-friendly Design

- Fully automated analyzer from sample to result
- Light indicator and intelligent UI make operation visualized
- Integrated packaging of cuvettes design avoids damaging the cuvette wall
- One-side operation saves your space
- Real-time display and light indicator realize convenient management of analyzer status
- Up to 2000 walk-away tests to economize manpower

High-efficiency Loading Design

- No-pause sample/reagent loading/unloading without interrupting the test
- RFID recognizes the reagent information and saves your time
- All samples can be defined as STAT to be tested in priority
- Four kinds of pipetting error detection technologies reduce sampling error rate

Top 10 Highlights of MAGLUMI® X6

- 1 Throughput up to 450 T/H — One of the highest throughput analyzer with the same size.
- 2 Flexible sample positions from 112 to 412 with just small upgrades.
- 3 Dual-mode wash liquid preparation — Automatic or manual based on multiple scenarios.
- 4 No-pause sample loading/unloading design and **STAT mode** to avoid wasting your time.
- 5 Up to 2000 walk-away tests to avoid high frequency of manual intervention.
- 6 "One-side operation" design to save your working space.
- 7 Intelligent **SnibeLinker™** remote service solution to ensure the fast response.
- 8 **MAGLUMI®** reagent kits are compatible with all **MAGLUMI®** series analyzers.
- 9 Intelligent UI for easy and convenient operation.
- 10 Four key technologies of **MAGLUMI®** X6 guarantee accurate and reliable results.

Technical Specifications

Main Features

- Throughput: up to 450 T/H (Single module)
- Sample expansion available
- Integrated wash liquid preparation
- Up to 2000 walk-away tests
- Modular Expanding Flexibility:
 - *Capable to integrated several modules
 - *Capable to link with Laboratory Automation System (TLA/LAS)

Reagent Loading

- 30 reagent positions on board with no-pause loading/unloading
- Double temperature mode ensures working temperature at 8°C-12°C and storage temperature at 2°C-8°C
- RFID reading all information of reagent
- Indicator light available, real-time status monitoring

Sample Loading

- Up to 112 sample positions (412 with expansion)
- No-pause loading/unloading, STAT available
- Indicator light available, real-time status monitoring
- Barcode recognition: Barcode reader available
- Sample editing mode: LIS connection, barcode recognition, manual editing

Reagent Features

- MAGLUMI® reagent kits are compatible with all MAGLUMI® analyzers
- Free calibrators and internal controls included
- 10 points master curve, 2-points re-calibration
- RFID tag storing all information of reagents
- Storage temperature 2°C-8°C

Reaction System

- Single cuvette with five-sided heating at 37.0°C (±0.3°C) incubation, ensuring accurate, quick and uniform incubation
- Non-contact mixing with different modes before incubation, ensuring sufficient reaction

Tip Storage

- Up to 384 TIPS loaded in one time
- Intelligent loading technology, continuous loading, real-time reserve monitoring

Sampling System

- New generation pipetting technology realizes lower volume
- Filtered TIP avoids aerosol pollution
- Liquid level detection, clot detection, prevent bubble interference, collision detection, wash automatically

Consumable System

- Single reaction cup design, no-pause loading/unloading
- Starters: 1.5 L of Starter 1 and Starter 2
- Wash liquid: Up to load 140 L at one time automatically
- Indicator light monitors real-time consumable quantity

Washer

- Intelligent magnetic field design ensures excellent separation
- 4-Step high-efficiency washing technology with non-contact vortex mixing
- Resuspension washing mode efficiently reduces non-specific binding and improves sensitivity
- Independent washing unit for waste liquid needle can completely wash without residue
- Integrated auto and manual preparation of wash liquid

Measuring Chamber

- High-sensitivity and low-noise photomultiplier tube (PMT)
- Heating and cooling bidirectional temperature control function included
- Original light pollution isolation technology prevents light pollution and ensures accurate and reliable results

Software System

- Friendly software UI design, humanized instrument operation procedure
- Real-time status display for each test procedure
- Self-recovery function make sure the analyzer running smoothly without unnecessary manual intervention
- Bidirectional SnibeLis™ connection by TCP/IP and COM Port
- Supporting SnibeLinker™ remote diagnosis system

Dimensions & Weight

- Dimensions: 148.2*94*155 cm
- Weight: 450 kg
