

# AZUR® FRAMING COIL

## Embolization Coils

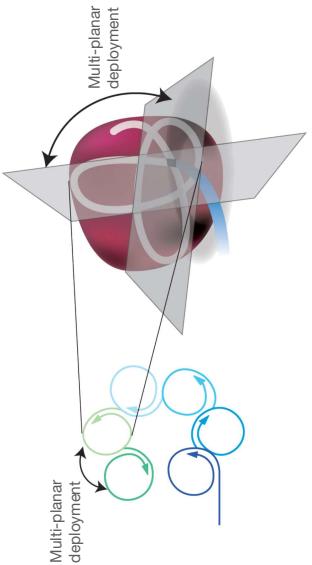

**AZUR® Framing coil** is a platinum coil that offers a three-dimensional shape to cover the aneurysm wall or the inner lumen of an artery.

This coil is intended to give greater stability and safety in challenging situations such as wide neck aneurysm or high flow territories.

### Product Characteristics

- Reduces compartmentalization and provides greater coverage with a three-dimensional approach to embolization
- Provides even distribution of coil loops at the lesion
- No time restriction for repositioning
- Longer coils for added stability (up to 50 cm)
- Conforms to diverse morphologies
- Facilitates placement of multiple consecutive framing coils
- Each successive loop gently rotates course, changing direction as it is deployed

### General Specifications

Core material	Platinum
Delivery type	Electromechanical detachment
Coating	None
Coil diameter	0.018" (0.46 mm)
Delivery wire length	175 cm
Catheter compatibility	Microcather - 0.021" inner lumen

### Item Specifications

Loop diameter (mm)	Length (cm)	Item reference
8	20	45-680820
10	26	45-681026
14	34	45-681434
20	50	45-682050

# AZUR® PERIPHERAL HYDROCOIL®

## Embolization coils

**AZUR® peripheral HydroCoil® embolization system combines a platinum coil and an expandable hydrogel polymer.**

The hydrogel coating expands in the direction of less resistance to fill space when introduced into the bloodstream.

### Product Characteristics

*Expanding Hydrogel technology that delivers:*

- Permanent mechanical occlusion with less reliance on thrombus formation
- Improved volume filling, packing density, and occlusion efficacy
- Mechanical stability
- Increased delivery control and long-term durability

**AZUR® detachable system:**

- First detachable system dedicated to peripheral use
- Can be retracted and repositioned, reducing the risk of migration
- Detached in less than one second at the push of a button

**AZUR® pushable system has been designed to be pushed by a wire without the need of a dedicated coil pusher.**

### Detachable system

# AZUR® CX

## Embolization coils

Introducing a unique concept.

The first and only peripheral HydroCoil® with cross-sectional coverage and the benefits of patented hydrogel technology, allowing more control in high-flow areas.

### Product Characteristics

#### Cross-sectional coverage

- Complex shape with variable diameter loops for optimal coverage in high-flow areas
- Smaller<sup>1</sup> first loop to ease coil placement in tortuous anatomy

#### Soft, flexible design

- Second generation Hydrogel technology on coil interior to enhance softness profile
- Solid coil core to increase volume fill

#### Ease of deployment

- AZUR Detachment System to deliver precise positioning and placement
- Progress Double Marker Microcatheter System to enhance visibility during detachment

1 Compared to Azur Hydrocoil
