# BOMAG UPTIME CENTER

## MORE UPTIME, GREATER EFFICIENCY, MORE SUCCESS.

In the Uptime Center, the machine data from BOMAG Telematics are collected and our experts can monitor the machines in realtime.

Any faults or potential problems are assessed by experts so that the responsible service partner can be informed if necessary. The next steps are coordinated with the customer in order to minimise the impact on the machine's daily operation.

The BOMAG Uptime Center – everything at a glance for more machine availability!

Starting with our special machines, we will gradually offer realtime support through the Uptime Center for all heavy equipment, both as part of the extended warranty or the full service contract. Can also be ordered at a later date in the future.\*

\* Realtime support by the BOMAG Uptime Center can only be provided if the BOMAG TELEMATICS general terms and conditions are accepted by the customer.

The customer hereby agrees to be contacted by BOMAG or the relevant service partner. This consent can be revoked in writing at any time.

### PERMANENT OVERVIEW

BOMAG helps you to avoid machine downtime – so you can focus fully on your core business.

### PLANABLE SERVICE INTERVALS

BOMAG supports you in optimising your deployment planning – efficient maintenance management allows you to operate your machine even more cost-effectively.

### SMOOTH PERFORMANCE

Maintenance and repair work can be carried out much more efficiently – our technicians arrive optimally prepared and equipped.

### MAXIMUM UPTIME

Our experts recognise faults before they become a problem – your machine remains fully operational.

### PROACTIVE SOLUTIONS

We know your machine – and can work with you to solve and prevent recurring problems.

### DATA-BASED DECISIONS

You know the performance and operating time of your BOMAG machine at all times and can identify and avoid overloads.
