62.01 Computer programming activities

Description

This class includes the writing, modifying, testing and supporting of software.

This class includes:

- designing the structure and content of, and/or writing the computer code necessary to create and implement:

- systems software (including updates and patches)
- software applications (including updates and patches)
- databases
- web pages

- customising of software, i.e. modifying and configuring an existing application so that it is functional within the clients' information system environment

This class excludes:

- publishing packaged software, see 58.29
- translation or adaptation of non-customised software for a particular market on own account, see 58.29
- planning and designing computer systems that integrate computer hardware, software and communication technologies, even though providing software might be an integral part see 62.02
