

Cemad

Standard Viscosity Bone Cement
with Gentamicin

Cemad Standard Viscosity Bone Cement with Gentamicin

Cemad-G40 is a radiopaque, standard viscosity, acrylic based (polymethylmethacrylate) and gentamicin bone cement. It includes gentamicin which has proven to be the antibiotic. It contains a pouch with radiopaque powder sterilized by ethylene oxide and an ampoule with liquid sterilized by filtration.

Key Features

Reduced mixing time

Unique dynamic mechanical properties

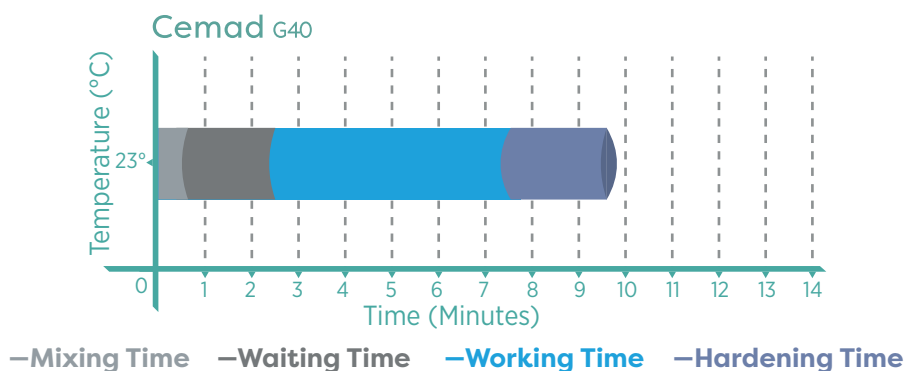

Release of efficient Antibiotic

Working time appropriate to the type of application

ISO 5833 standard

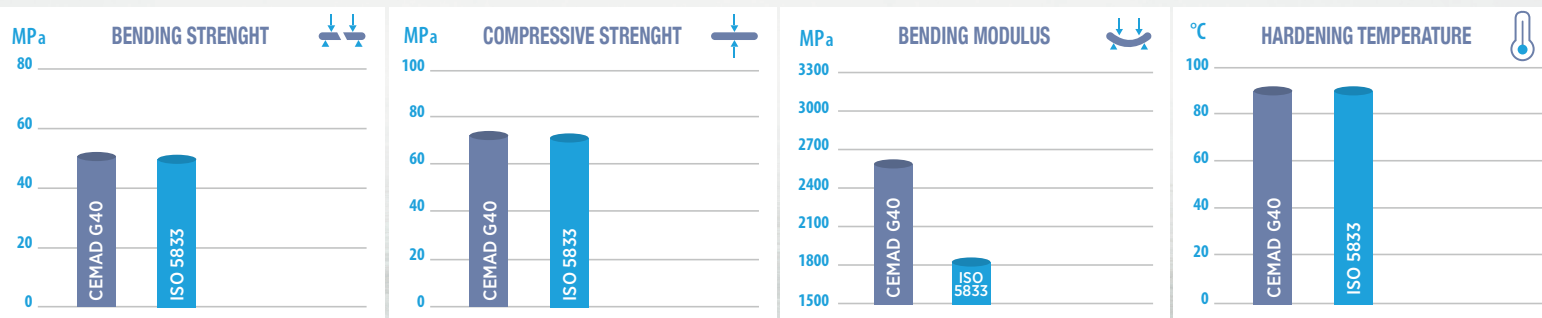

Standard viscosity

Working Time According to ISO 5833

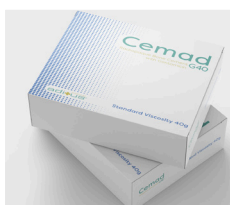

Cemad Bone Cement with Gentamicin is complying ISO 5833 specifications.

Mechanical Properties According to ISO 5833

Order Information

Reference Code	Product Description	Contents
ADCEMG20	CEMAD-G20 Standard Viscosity Bone Cement with Gentamicin	20g
ADCEMG40	CEMAD-G40 Standard Viscosity Bone Cement with Gentamicin	40g
ADCEMG60	CEMAD-G60 Standard Viscosity Bone Cement with Gentamicin	60g
