

1.5ml Microcentrifuge Tube

BOENMED® 1.5ml Microcentrifuge Tube

BOENMED manufactures 1.5ML MICROCENTRIFUGE TUBE.

The conical 1.5 mL Microcentrifuge Tubes are ideal for the processing and storage of small volume samples, extracts and reagents.

The 1.5ml microcentrifuge tubes are made of PP material, resistant to most chemical reagents and autoclavable.

Flat top, and with a large frosted writing area for easy sample identification.

The attached flat top cap is easy to open and close with one hand.

Tight-fitting lid provides a leak-resistant seal.

Molded graduation for volume estimation.

Specifications
