Bitdefender®

GravityZone Security for Endpoints

Bitdefender GravityZone is a resource-efficient security solution that provides high performance and protection while delivering centralized management, easy deployment and the freedom to choose any combination of virtualization vendors, cloud providers, servers, desktops, laptops and mobile devices. Bitdefender GravityZone Security for Endpoints protects any number of laptops, desktops (Windows and Mac), embedded devices and servers by using #1-ranked antimalware technology combined with a two-way firewall, intrusion detection and application control capabilities.

GravityZone Enterprise Security provides flexible licensing options to fit the protection needs of your offices, datacenters and public cloud. All security services are delivered from **one virtual appliance** to install on premise covering all endpoints across your environment.

KEY BENEFITS

Simple and easy to deploy, lowers implementation duration and cost

Delivered as a Linux Ubuntu self-configuring hardened virtual appliance, integrates with VMware vCenter, Citrix XenServer, and Active Directory

Scalable and resilient security

Eliminates single point of failure and AV storms, grows organically by cloning virtual appliances and automating deployment with golden images

Breakthrough resource optimization for physical machines

Security offloading for all types of endpoints in laptops and desktops

High availability and performance

GravityZone Security for Endpoints is delivered within a virtual appliance with built-in redundancy to minimize risks and performance issues when managing large environments, and drastically reduces the manual effort and hardware needed to maintain an enterprise-wide security system.

Simplified security management

GravityZone Security for Endpoints simplifies security operations, reduces the time required to manage and maintain security operations and further streamlines security management workflows.

COMPREHENSIVE FEATURE SET

GravityZone Security for Endpoints includes a fully featured two-way firewall with intrusion detection, antiphishing, web filtering, user and web control that blocks increasingly diverse threats from infecting end-user systems and server endpoints.

SIMPLIFIED SECURITY MANAGEMENT

GravityZone Security for Endpoints simplifies security operations, reduces the time required to manage and maintain security operations and further streamlines security management workflows.

SIMPLE ROLLOUT

GravityZone Security for Endpoints provides a turnkey virtual container deployment, automatically uninstalling legacy endpoint clients and integrating with Microsoft Active Directory, accelerating rollout.

KEY FEATURES

- Smart Scanning - centralized scanning offloads security tasks to Security Virtual Appliances
 - Environment-aware security agent
 - Integration with Microsoft Active Directory
 - Intelligent deployment
 - Breakthrough resource optimization for physical machines
 - Multiple layers of security for endpoints: antivirus and antimalware with behavioral monitoring, zero-day threat protection, application control and sandboxing, firewall, device control and content control
 - Apply policies based on location or user and allow different levels of freedom, save time when creating new policies by using ones that are already created.
 - Test the new installation kits and updates delivered by Bitdefender before deploying them in production in your own testing environment with endpoint staging.
- Antimalware**
 - Antimalware, Antivirus, Antispyware, Antiphishing, Trojan and Rootkit detection
 - Behavior Monitoring and Application Control
 - Firewall**
 - Fully featured two-way personal firewall and Host-based intrusion detection and prevention HIDS / HIPS
 - Content Control**
 - Multiple thread filtering of web content to identify potential online threats
 - Device Control**
 - Port and device control to effectively enforce data protection policies
 - Application Control Whitelisting***
 - Creates inventory of authorized applications and prevents the execution of malware or unauthorized software.

ANTI-RANSOMWARE VACCINE

You can now immunize your endpoints against known ransomware by enabling this new protection option.

ANTI-EXPLOIT

Bitdefender GravityZone further augments existing technologies to fight off targeted attacks. The new technology is equipped to tackle advanced, evasive exploits that targeted attacks rely on to penetrate an infrastructure. Anti-exploit techniques are integrated into proactive Advanced Threat Control technology.

*Application Control Whitelisting is available for Windows platform only (starting with Windows 7 for desktop and Windows Server 2008 R2). Application Control Whitelisting should not be activated on File Servers.

SUPPORTED OPERATING SYSTEMS

Security for Endpoints currently protects the following operating systems:

Workstation operating systems:

Windows 7, 8, 8.1, 10
Windows Vista (SP1, SP2)
Mac OS X Mountain Lion (10.8.5), Mavericks (10.9.x),
Yosemite (10.10.x), El Capitan (10.11.x)

Tablet and embedded operating systems:

Windows Embedded Standard, POSReady, 2009, 7
Windows Embedded Enterprise 7, Tablet PC Edition

Server operating systems:

Windows Server 2012, 2012 R2
Windows Small Business Server (SBS) 2008, 2011
Windows Server 2008, 2008 R2,
Windows Home Server
Red Hat Enterprise Linux / CentOS 5.6 or higher
Ubuntu 12.04 LTS or higher
SUSE Linux Enterprise Server 11 or higher
OpenSUSE 11 or higher
Fedora 16 or higher
Debian 7.0 or higher
Oracle Solaris 11, 10 (only in VMware vShield environments)
Oracle Linux 6.3 or higher

Management platform (Control Center)

All Bitdefender GravityZone security services are managed by Control Center, delivered as a virtual appliance:
OVA (compatible with VMware vSphere, View)
XVA (compatible with Citrix XenServer, XenDesktop, VDI-in-a-Box)
VHD (compatible with Microsoft Hyper-V)
TAR.BZ2 archives for KVM, Oracle or
RedHat Enterprise Virtualization
Support for other formats and virtualization platforms may be provided on request.

Bitdefender®

PROTECTING OVER 500 MILLION USERS WORLDWIDE

Bitdefender is a global security technology company that provides cutting edge end-to-end cyber security solutions and advanced threat protection to more than 500 million users in more than 150 countries. Since 2001, Bitdefender has consistently produced award-winning business and consumer security technology, and is a provider of choice in both hybrid infrastructure security and endpoint protection. Through R&D, alliances and partnerships, Bitdefender is trusted to be ahead and deliver robust security you can rely on. More information is available at <http://www.bitdefender.com/>.
