INTRODUCER KITS

ENGINEERED
TO ADDRESS
THE DETAILS

PUSHING BOUNDARIES

**TERUMO**
INTERVENTIONAL
SYSTEMS

Vascular access is where complications can and do occur, therefore using the right tool for the right vessel is paramount.

We are committed to helping you achieve improved patient outcomes. Terumo provides products which have been engineered to address the details.

Discover our full line of femoral and radial sheaths, designed to minimise trauma and reduce complications.
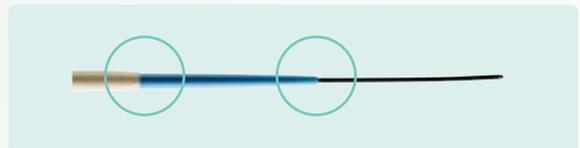

RADIFOCUS™ *Introducer II*

Standard Introducer Kit

Fr size indication

Sheath

Dilator

Mini guidewire

Side tube

3 way stop cock

KEY FEATURES

- **Total Integrated Fit (TIF) tip tapering**
  Optimal tapering design at the tip of the sheath and dilator for smooth penetration

- **Cross-cut hemostasis valve**
  Effectively protects against blood reflux and air aspiration

- **Thin radiopaque sheath with anti-kinking sleeve**
  For excellent catheter handling

- **Snap-on / click-off dilator lock**
  Prevents dilator back-out during insertion and allows one-hand unlocking

- **Wide variety of kit variations providing all elements for quick vessel access**
  4 - 11 Fr sheaths, 5 - 25 cm lengths
  Surflash or micro puncture metal needle

A-Kit includes: introducer sheath, dilator, mini guidewire, entry venous catheter, 2.5 cc syringe
B-Kit includes: introducer sheath, dilator, mini guidewire
**C**-Kit includes: introducer sheath, dilator
R-Kit includes: introducer sheath, dilator, mini guidewire, 18 G x 2 ³/⁴" entry metallic needle

When the mini guidewire has an angled tip or a J tip, the kit also contains a guide inserter.

Other code numbers are available on special demand. For any further information, please contact your Terumo local representative.

1 Kiemeneij F et al. Hydrophilic coating aids radial sheath withdrawal and reduces patient discomfort following transradial coronary intervention: a randomized double-blind comparison of coated and uncoated sheaths. Catheter Cardiovasc Interv 2003;59:161-164
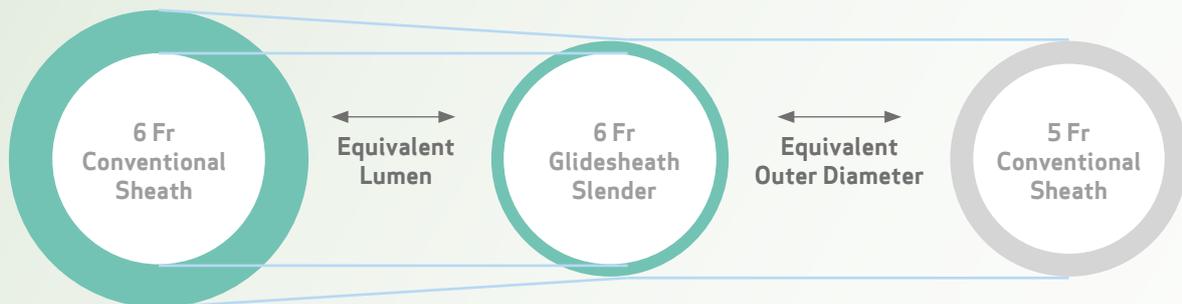

Glidesheath Slender™

Transradial Introducer Kit

Glidesheath Slender offers true minimal invasive radial access for procedures requiring 5, 6, and 7 Fr sheaths.

Proprietary thin-wall technology reduces the outside diameter of the introducer sheath by 1 Fr whilst maintaining a larger inner-diameter equivalent.

| 6 Fr Conventional Sheath | Equivalent Lumen | 6 Fr Glidesheath Slender | Equivalent Outer Diameter | 5 Fr Conventional Sheath |

KEY FEATURES

- **Ultra thin-wall technology, resulting in 1 Fr size outer diameter reduction while keeping a larger inner diameter equivalent**
  Reduced chance of spasm, radial injury and delayed radial artery occlusion[1]

- **Terumo Hydrophilic Mcoat**
  For ease of insertion and removal

1 Kotowycz M, Džavík V. Radial Artery Patency After Transradial Catheterization. Circ Cardiovasc Interv. 2012;5:127-133

PRODUCT SPECIFICATIONS

Glidesheath Slender is available in 5, 6 and 7 Fr sizes, 10 and 16 cm lengths,
with plastic IV catheter or metallic entry needles included in the kits. No syringe included.

RADIFOCUS™ *Introducer II*

Introducer Kit with Radiopaque Marker

KEY FEATURES

- **Platinum-iridium radiopaque marker band at the sheath tip**
  Great visibility for precise positioning

- **Radiopaque marker welded into the wall of the sheath**
  Reduces friction

PRODUCT SPECIFICATIONS

B-Kit
Contains sheath, dilator, spring mini guidewire, guide inserter.

ACCESSORIES

RADIFOCUS™ *Obturator*

For support of the wall of the introducer sheath without a catheter in place.

KEY FEATURES

- The hub is made of polypropylene and the tube is made of polyester elastomer, containing bismuth and has a rounded tip
- Snap-on connection to sheath hub
- High flexibility and kink-resistance
- Color coded
