MEDTRONIC ENERGY-BASED DEVICES (EbD)

The world leader in radiofrequency (RF) energy-based systems, is committed to providing you with a complete line of products that contribute to the safest possible surgical environment. EbD manufactures a full range of RF energy products* — electrosurgical and tissue fusion generators, pencils, patient return electrodes, and an entire line of tissue fusion and ultrasonic dissection accessories. Our fully integrated systems set the industry standard in patient care and purchasing efficiency.

*Please contact your local Medtronic sales representative or distributors for further information about products and their availabilities.

2015

THE VALLEYLAB™ FT10 ENERGY PLATFORM

The latest hardware innovation for precise energy delivery

2006

Forcetriad™ becomes first combination generator with monopolar, bipolar, and advanced ligation

2014

Valleylab™ LS10 is the latest single channel vessel sealing generator. It is simple, affordable and portable, making Ligasure™ vessel sealing technology more accessible in any operating room in the world

1999

Ligasure™ vessel sealing system becomes first energy-based ligation system

1995

Force fx™ introduces Instant Response™ to monitor and respond to changing tissue

1984

Force 2, the most widely produced of all Valleylab ESUs, introduces simultaneous coag

1968

SSE1 is the first portable, solid state ESU on the market

1973

Surgistat™ debuts as a smaller generator for office-setting procedures

1974

SSE2K incorporates a leakage canceling circuit, as well as both monopolar and bipolar capabilities

ENERGY POWERED BY INTELLIGENT GENERATORS TO DELIVER SUPERIOR PERFORMANCE FOR BETTER PATIENT OUTCOMES.

TISSUEFECT™ SENSING TECHNOLOGY

TissueFect™ sensing technology is a control system designed to precisely manage energy delivery creating a range of options for desired tissue effect.

This provides the surgeon with consistent power delivery in all monopolar, bipolar and vessel sealing modes.

VALLEYLAB™ EXCHANGE SOFTWARE UPDATE SYSTEM (VLEX)

The Valleylab™ Exchange Software Update System is an innovative service that allows remote updates to the software in the ForceTriad™ energy platform, without shipping the energy platform to a service facility.

This service will enable customers to benefit from current software updates as soon as they are available, with minimal downtime, and is the first remote-access update service in the electrosurgery field.

VALLEYLAB™ MODE

A new waveform, Valleylab™ mode provides a unique combination of

monopolar hemostasis and dissection while using a lower power setting resulting in less char, less thermal spread and less arcing than a traditional coagulation mode.

ADAPTIVE REM™ SYSTEM

Adaptive REM™ combines the feedback circuitry of hardware monitoring with an advanced software-controlled adaptation feature.

The adaptive system still maintains the 5-135 ohms limits, but also creates a window of acceptable impedances based on contact conditions of the individual patient.

GENERATORS

VALLEYLAB™ FT10 ENERGY PLATFORM

Valleylab™ FT10 energy platform not only drives our full portfolio of energy-based devices, it makes them better than ever. When used with the Valleylab™ FT10 energy platform:

LigaSure™ technology is improved with:

- Up to 50% faster sealing times
- Lower jaw temperatures

Electrosurgical performance is more precise:

- Auto bipolar has a faster activation time
- Monopolar performance is improved

- Advanced TissueFect™ Sensing Technology: 434,000 times/sec
- Bipolar Cable Compensation
- Soft Coag Mode
- Enhanced Auto-Bipolar mode
- Unique Valleylab™ mode for enhanced dissection and hemostasis
- Single, simplified touch screen
- Adaptive REM™ Technology
- Software upgrade (VLEX) via ethernet connection (WiFi capabilities not enabled yet)

GENERATORS

VALLEYLAB™ LS10 ELECTROSURGICAL GENERATOR

Valleylab™ LS10 Generator is a single-channel vessel sealing generator. Both affordable and portable, the LS10 generator makes the next generation of LigaSure™ vessel sealing technology accessible to customers around the globe. Valleylab™ LS10 Generator platform is intended for open and laparoscopic surgical procedures.

- Intelligent TissueFect™ Sensing Technology: 20,000 times/sec
- Fast sealing time of 2 to 4 seconds
- Smart™ Connector recognises which LigaSure instrument is being used and automatically configures energy settings
- Simple control panel
- Compact and lightweight
- Software upgrade (VLEX)

FORCETRIAD™ ENERGY PLATFORM

A full-featured electrosurgical system that provides electrosurgical cutting and coagulation, bipolar functionality, and Ligasure™ vessel sealing in a single generator.

- TissueFect™ Sensing Technology: 3,333 times/sec
- 3 panel touch screen technology
- Unique Valleylab™ mode for enhanced dissection and hemostasis
- Auto-Bipolar capability
- Adaptive REM™ Technology
- Software upgrade (VLEX) via serial port connection

GENERATORS

INSTANT RESPONSE™ TECHNOLOGY

This smart generator technology features an advanced feedback system that senses changes in tissue impedance and adjusts output accordingly.

The results includes:

- Less thermal damage to surrounding tissue
- More consistent surgical performance
- Ability to use lower power settings
- Less electrode drag
- Less capacitive coupling

FORCE FX™-C ELECTROSURGICAL GENERATOR

The Force FX™ generator C with Instant Response™ technology is designed for the most demanding monopolar and bipolar procedures.

- Instant Response™ technology
- Adaptive REM™ system
- Isolated output
- Interlink cable required for use with RapidVac™ or OptiMumm™ smoke evacuation systems — must be ordered separately
- PER of 98 in cut

SOFTWARE APPLICATION FORCETRIAD™ ENERGY PLATFORM

BIPOLAR RESECTION

The Bipolar Resection Activation Kit enables activation of the bipolar-resection application on a single ForceTriad™ energy platform with software version 3.30 or greater. The application is intended for use in (TURP), (TURB) and hysteroscopic resection.

ACTIVATION KIT BIPOLAR RESECTION FOR THE FORCETRIAD™ ENERGY PLATFORM

- Telephone and email contact information for EbD technical support – to be contacted for activation of this software application
- RS232 cable for connecting the ForceTriad™ energy platform to the biomed PC (for Valleylab™ Exchange)
- License Key Code to be provided to technical support
- CD-Rom with user guides
- Three labels to be applied to the ForceTriad™ energy platform after activation of the software application

FTBRKIT

1 each

THE REMOTE CONTROL APPLICATION

The Remote Control Application is an add-on software that enables communication between a ForceTriad™ energy platform and a third-party remote-control system. Once the application has been activated, an energy platform can be integrated into a system of multiple hardware components operated from a central location. This application needs Software Version 3.4 or higher.

ACTIVATION KIT REMOTE CONTROL FOR THE FORCETRIAD™ ENERGY PLATFORM

- CD with the User's Guide Supplement -Remote Control Application
- License Key (Provided on the inner box label and internal packaging)
- RS-232 cable
- Remote access panel assembly (panel with 2 screws)

HET™ BIPOLAR™ SYSTEM

The HET™ Bipolar System is a gentle, simple and effective¹ non-surgical treatment option for symptomatic grades I and II internal hemorrhoids. Its patented design allows treatment of all hemorrhoids in one procedure.

The treatment targets the area above the dentate line and its low treatment temperature minimizes collateral tissue damage.

Hemorrhoid Energy Therapy, using the HET™ Bipolar™ System takes only seconds to complete with minimal pain to the patient¹.

¹ The HET™ Bipolar™ System demonstrated effectiveness in a single center retrospective study with 23 patients. Kantsevoy S, Bitner M. Nonsurgical treatment of actively bleeding internal hemorrhoids with a novel endoscopic device (with video). Gastrointestinal Endoscopy, Vol 78, No. 4: 2013. 649-653.

ELECTROSURGICAL ELECTRODES, STERILE, SINGLE USE EDGE™ COATED ELECTRODES

COATED ELECTRODE TECHNOLOGY

Coated electrodes provide a wide range of benefits to the surgeon, including improved surgical performance and easier cleaning as compared to traditional stainless steel electrodes. There are several types of coated electrodes, all of which perform differently during surgical procedures. EDGE™ coated electrodes are manufactured using high-quality surgical steel and a durable, proprietary, elastomeric polymer coating. EDGE™ electrodes provide a more consistent surgical effect with lower power settings.

UNCOMPROMISED CUT PERFORMANCE throughout a variety of procedures, no matter what type of tissue. The EDGE™ electrodes provide cut performance like stainless steel – but with a clean advantage.

EASY TO CLEAN saves you time. With Valleylab's proprietary coating, no scraping is required. Just wipe clean with a wet sponge and continue.

DURABLE AND BENDABLE without compromising the integrity of the coating. EDGE™ coated electrodes are

bendable up to 90 degrees without the coating degradation or flaking that can occur with PTFE electrodes. IMPROVED SAFETY with the NEW Safety Sleeve™ insulated electrodes. These electrodes provide an increased level of safety especially in procedures when the pencil tip can come in contact with unintended target tissue. There is no need to insulate these electrodes with rubber catheters or electrode tip protectors.

CHOICE OF STYLE EDGE™ coated electrodes are available in a wide variety of styles, including blades, needles, three electrode lengths, and insulated electrodes for increased safety when used in close proximity to non-targeted tissue. EDGE™ electrodes can be purchased in your favorite Energy-based Devices button or rocker switch pencil for greater convenience and cost savings.
