# COMPANY PROFILE

Shaoxing ShangYu Mingji Plastic Co., Ltd is a factory who are professional in manufacturing lab disposable for more than 10 years. After years developing ,we have standard clear workshop with Germany injection machines,original design molding team and Qaulity control team with rich experience.

We are near to SHANGHAI and NINGBO PORT.

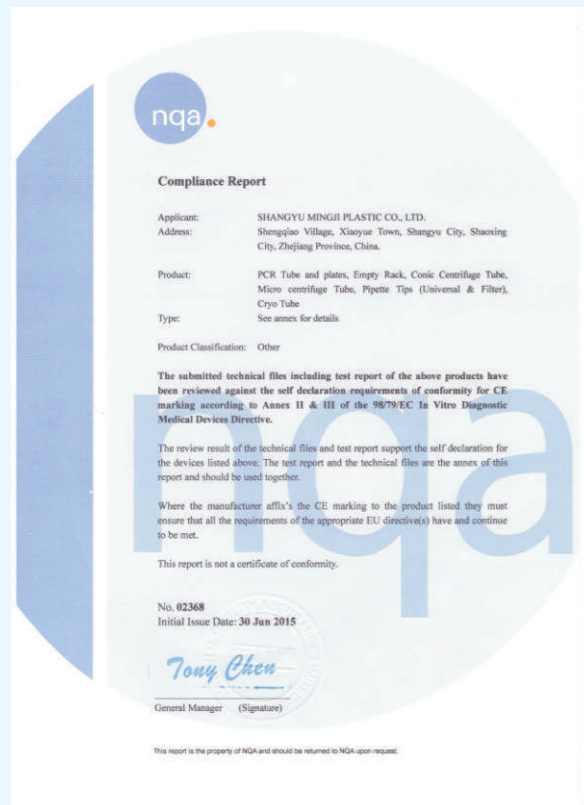

OEM is available for customers.

Our company is specialized in Piptte Tips which are fit most Brand Pipette, Centrifuge Tube and PCR series.

Products are exported to more than 30 countries, such as North America, East Asia, African and Europe

Mingji Plastic already have gotten certificates of CE, ISO9001:2008

All our efforts is for your research!

## PIPET TIPS

Without any detectable DNA enzymes, RNA enzymes, proteins, DNA, heat and metal.

**\*Accuracy**

Special technic let mold be high degree of accuracy.

**\*Cleanse**

Standard clear workshop, no one touch from raw material to products.

**\*Universality**

Fit for many brands of pipettors, such as EPPENDORF, GILSON, COSTAR, and so on.

**\*Popular**

The special shape let fluid less remaining.

## FILTER TIPS

Without any detectable DNA enzymes, RNA enzymes, proteins, DNA, heat and metal.

Better sealability with soft but tough centrum design.

Kinds of filter with different size of pore to ensure your result correct under differet working situation.

Exact scale mark let reading easily and conveniently.

Tip go slender gradually ensure handling mirco fluid.

Experiment prove tips with filter will work better under enviroment condition which with particle.

## CENTRIFUGE TUBES

Our centrifuge tubes are manufactured from high-clarity polypropylene. Graduations are printed in a bold easy-to-read and are accurate to  $\pm 2\%$ . Large white marking area provides excellent contrast for identification. The extended cap design facilitates one hand removal of caps and helps prevent contamination. Conical bottom tubes have smooth, flat surface polyethylene caps. Max rotate speed up to 12,000g for 15ml conical bottom centrifuge tubes, 9500g for 50ml centrifuge tubes. Autoclavable at 121°C and freezable to -80°C. Available in sterilized or non-sterilized.

## 0.2ML&0.5ML THIN-WALL PCR TUBE

These high quality PCR Tubes with flat and frosted caps are suited for labelling. They offer great flexibility in opening and closing repeatedly. The tubes are very well suited for centrifugation purposes and thermal cycling applications. They can be used in many block regular and Real-time thermal cyclers. These extra strong flat capped tubes are also available in a frosted version, to enhance signal yields in Real-time PCR applications.

Without any detectable DNA enzymes, RNA enzymes, proteins, DNA, heat and metal

## THIN-WALL 8-STRIP TUBE WITH 8-STRIP CAP

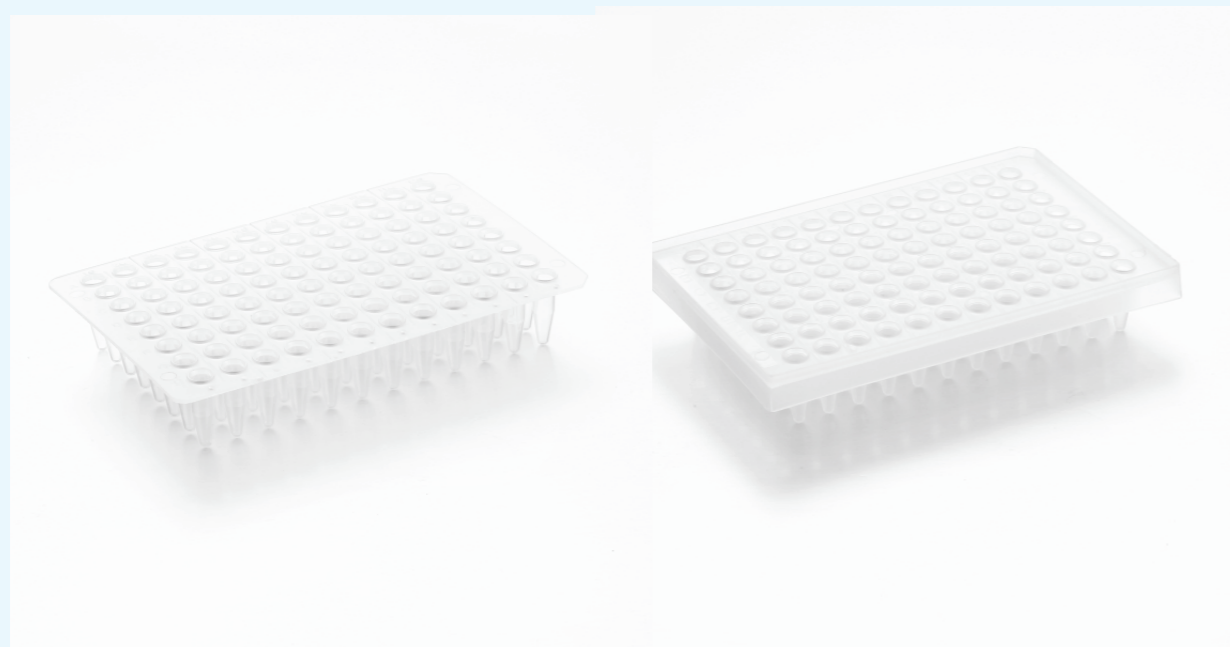

8-strip tube is manufactured from prime virgin polypropylenes. This result in tubes, strips and tips that exhibit a perfect balance between transparency, softness, robustness, antistatic characteristics and gas tightness. This tube can be used in most 0.2ml block regular and Real-time thermal cyclers. Closure can be accomplished with flat or semi-domed 8-strip cap.

Without any detectable DNA enzymes, RNA enzymes, proteins, DNA, heat and metal

## 0.1ML/0.2ML 96WELLS PCR PLATE

PCR plate is made from high-quality virgin polypropylene. It could be used in any Applied Biosystems regular or Real-time PCR Thermal cycler. Closure can be accomplished with either optical or strip caps.

None-skirted plates can be easily cut into 16,24,32 or 48 well pieces.

Forsted Subskirted Plates suited for both automatic loading as well as robotic handing.

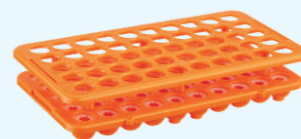

Without any detectable DNA enzymes, RNA enzymes, proteins, DNA, heat and metal

## PETRI DISH

This Petri Dishes are right containers for bacterial culture, and also useful in sample separation, pre-treatment, storage and so on, and Manufactured from virgin polystyrene. Uniform wall thickness ensures distortion-free bottom, dish surface is smooth and free from striation to maximize usable area for growth. The rim on upper side of the lid mates with the dish brim for easy and secure stack. Lids with several little chimbs to shape vents are available for very effective gas exchange.

## SEROLOGICAL PIPETTES

Serological pipettes are manufactured with exclusively high-grade polystyrene (GPPS) which are excellent for clear observation and reducing liquid attachment on the pipet surface to assure accurate delivery. This product is high quality and can be safely used in cell and tissue culture, bacteriological, and clinical research. Graduations are calibrated for accurate dispensing to within  $\pm 2\%$ .
