## DESCRIPTION SMS SURGICAL GOWN

It is a type of fabric that is 100% recyclable, produced with nonwoven technology and PP raw material, without being woven or knitted. It is obtained by integrating the melthblown layer that acts as a filter between two spunbond fabrics. Thanks to its waterproof structure and the filter in the interlayer, it is a breathable fabric that does not allow viruses and bacteria to pass through. It is used in all areas requiring hygiene and protection. It is produced as sterile and non-sterile. Belts are customizable.
