### We create fine solutions

W W W . Z A R Y S . C O M

ZARYS International Group is a company with 33-year experience in the medical device industry. Since the foundation in 1989 ZARYS has surmounted a variety of business, trading and economic upheavals in becoming the market leader in healthcare distribution in Poland and abroad.

ZARYS offers a wide range of products including dressings, surgical drapes, examination gloves, disposable medical devices for urology, gynaecology, oxygen therapy and many other items. The company is still expanding its product list in order to meet new market needs.

What distinguishes ZARYS from the competitors is strong ethics and continuous search for new solutions. In order to meet our clients' expectations we are constantly reviewing our product range. All of our devices are selected very carefully with great attention paid to current needs, quality convenient availability. The company has the pleasure to cooperate with highly qualified health care specialists, who share with us their expertise and understanding of the latest trends in clinical practice.

We offer products under our own brand and distribute the world's top manufacturers' medical devices. Our team believes that maintaining fair and reliable relationships with our international partners is the key to turn a business opportunity into a major success story, therefore we regularly visit our customers and suppliers in their own countries and handle challenges together.

 $Our \ values, strategies \ and \ comprehensiveness \ guarantee \ successful \ and \ satisfactory \ cooperation.$

- prevention of surgical site infections
- patient isolation

## Medical gloves

**EXAMINATION GLOVES** are intended for temporary use during medical examinations, diagnostic and therapeutic procedures, for handling medical contaminated material in order to reduce the risk of: transferring dangerous biological material through hands to a patient, acquisition of infections from patients by healthcare workers. Gloves are subject to the restrictive requirements of standards harmonized with the Regulation (EU) 2017/745 concerning medical devices and the Regulation (EU) 2016/425 of the European Parliament and of the Council on personal protective equipment.

NITRILE GLOVES are made of synthetic acrylonitrile butadiene rubber (NBR), they are an alternative to latex gloves. They do not contain latex proteins that cause type I allergic reactions, and the content of chemical accelerators is minimized, so they are friendly to the skin. They are characterized by high mechanical strength (also for puncture), chemical and biological resistance (constitute a barrier for viruses and bacteria), flexibility, thanks to which they adjust to the hand, providing the work comfort to the user. Thin walls and textured finger surface enhance grip and guarantee excellent tactile sensitivity.

**LATEX GLOVES** made of natural rubber are recognized as the best barrier against blood-borne pathogens and part of hazardous chemical substances. They are also characterized by high flexibility, providing the work comfort to the user by fitting to the hand like a "second skin". Latex gloves, due to the natural raw material, are biodegradable. However, they can cause type I allergic reactions at people sensitive to proteins of natural rubber. Powdered gloves usually contain modified maize flour to facilitate glove donning. In the case of powder-free gloves, the inner surface is usually chlorinated or polymer-coated.

VINYL GLOVES made of PVC (polyvinyl chloride) are intended for low-risk procedures due to limited mechanical, chemical and biological resistance.

The glove material does not cause
Type I allergic reactions, only plasticizers can provoke a reaction in sensitized people - phthalates added during production to increase flexibility.

ZARYS vinyl gloves are free of harmful phthalates.

## **Basic medical devices**

ZARYS International Group prides itself with a long lasting experience gained in the medical industry being a leading manufacturer and supplier of single use medical devices.

A wide range of products and complex solutions make it possible to successfully respond to our customers' needs and meet their expectations.

High standards of design, production, storing and transportation allow to maintain quality, safety and comfort of use to both the medical personnel and patients. A wide range of single use products include basic medical devices and those dedicated to specialized procedures.

ZARYS branded products find a wide application in anesthesiology, urology, gynecology, oxygen and fluid therapy and in many other medical specialities. They make it possible to perform medical procedures including patient diagnostics, prophylaxis, treatment and care.

## BASIC DISPOSABLE EQUIPMENT

### dispoFINE

### injection needle, sterile

#### features

- needle tube is made of smooth and durable stainless steel
- · sheath and hub made of polypropylene
- thin walls assure adequate stream pace
- tip sharpened in three surfaces (back cut)
- bevel type: LB/BL standard long bevel
- surface of needle tube covered with sliding agent (silicone)
- glued needle elements to prevent their separation (glue epoxy resin)
- hubs coloured in accordance with ISO code allowing fast recognition of needle size
- latex-free, phthalate-free
- · non-toxic, non-pyrogenic
- EO sterilized
- packaging: 1 pc./paper-foil

#### indication

· device designed for intravenous, intramuscular and hypodermic injections

### construction of the syringe

**GET TO KNOW OUR SYRINGES** 

### nozzle types:

### Luer slip, centric

tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary

### Luer slip, eccentric

eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary

### Luer-Lock

designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection

### catheter tip 90°

type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes

### insulin and tuberculin syringes

special design of the plunger seal reduces the drug/liquid residues

### safeLANCE

### pressure-activated safety lancet, sterile

#### features

- easy to use, minimizes unpleasant feelings
- special construction allows lancet tip to be automatically inserted into finger pad and then to be retracted so that needle is not visible before or after puncturing
- correctly matched size of lancet allows you to get optimal amount of blood with minimal patient's pain
- design ensures safety for medical personnel and patient by eliminating accidental puncture and infection
- perfect guidance of lancet needle inside housing reduces vibration, thus decreases patient's pain and prevents damage to skin tissue
- available in two sizes:
- 23 G, puncture depth 1,8 mm green, dedicated for women and children
- 21 G, puncture depth 2,4 mm pink, dedicated for men
- latex-free, phthalate-free
- single-use
- sterilized by radiation
- packaging: 100 pcs/box

#### indication

 capillary blood sampling from fingertip or ear flap for testing, for example, glucose level

### dispoSULIN

### insulin pen needle, sterile

#### features

- $\bullet \ \ \mathsf{made} \ \mathsf{of} \ \mathsf{polypropylene}, \mathsf{polyethylene} \ \mathsf{and} \ \mathsf{stainless} \ \mathsf{steel}$
- triple-point needle blade allows easy and atraumatic skin penetration
- covering the needle with silicone lubricant reduces resistance during injection
- thin walls of needle ensure easy flow of medicine and the right flow rate
- coloured cap and paper cover of packaging make it easy to quickly recognize size of needle
- available in various sizes, allowing you to adapt to individual needs
- universal, compatible with all pen modelssingle-use
- non-pyrogenic, non-toxic
- latex-free, phthalate-free
- EO sterilized
- packaging: 100 pcs/box

- for subcutaneous injection
- dedicated for use with pre-filled pens (insulin pens)

### side hole needle

### insulin pen needle, sterile

#### features

- made of stainless steel
- the needle hub ideally suited for Luer and Luer-Lock (to ensure full tightnessof the connection with syringes)
- CE sign comply with PN-EN-ISO 7864
- individual packaging comply with PN-EN 556 and PN-EN 868, type blister- pack coloured cap and paper cover of packaging make it easy to quickly recognize
- single-use
- EO sterilized
- shelf life: 5 years

- made of high quality materials, using the latest technology, which guarantees its high quality and failure-free, intended usage
- special design needle with a pencil cut with a side hole, designed to withdraw medication from a vial, including vials with a rubber stopper
- needle construction prevents from accidental, unintended production of rubber scrubs, in order to avoid contamination of the drug
- side hole with special cut, placed on the top of the needle enables free dissolution of the drug and limits foaming by directing the fluid directly onto the walls of the vial

### stomach tube/duodenal tube

#### sterile

#### features

- made of PVC
- made of material that is resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded closed tip
- · four lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on packaging
- stomach tube is available in 3 lengths: 80 cm, 100 cm, 125 cm and duodenal tube is available in 150 cm length
- latex-free
- single-use
- EO sterilized
- packaging: 1 pc./paper-foil

- inserted through nose or mouth into stomach or duodenum
- drainage of stomach/intestinal content
- decompression of stomach (air or food evacuation)
- · gastric lavage
- taking samples of stomach content
- control of bleeding from the upper section of digestive tract
- evaluation of secretory function
- administration of medicines, fluids and/or food content into stomach or duodenum

### feeding tube graduated, with X-ray contrast

### sterile

#### features

30

- made of soft PVC with a frosted surface, resistant to bending and kinking due to the appropriate degree of hardness
- · atraumatic, soft rounded, closed tip facilitates precise insertion of catheter
- two alternate end holes with gently stretched edges
- · connector compatible with the conical tip of Luer syringe
- integrated stoper allows the tube to be closed tightly
- colour-coded connectors for size recognition, numerical size identification on packaging
- radiopaque line along the entire length of the catheter
- digital depth graduation every 1 cm (from 5 cm to 40 cm)
- length 50 cm
- name of the manufacturer placed on the catheter
- individually packed straight
- latex-free
- phthalate-free
- single-use
- EO sterilized
- shelf life: 5 years
- packaging: 1 pc. / paper-foil

#### indication

· device inserted through patient's nose or mouth to perform enteral nutrition

### withdrawal cannula, sterile

#### feature

- easy to use, ergonomic shape
- body with knurled surface for a secure grip
- sharp receiving spike enabling tight and safe connection with containers of different capacity
- receiving spike groove guarantees complete emptying of the container
- hermetic self-Locking cap securing the connector against contamination
- available in version with air filter and in version with air and particle filter
- air filter protects against microbiological contamination and against harmful aerosols
- particle filter is an effective barrier to protect drugs and liquids from contamination
- female Luer-Lock connector compatible with products with either male or female Luer-Lock
- free of latex, PVC and phthalates
- non-pyrogenic
- single-use
- EO sterilized
- packaging: 1 pc./ paper-foil

- device for needle-free dissolving and / or withdrawing drugs from multi-dose packages (bottles, vials, etc.) - in both directions
- dicoSPIKE Chemo model is designed for medicines releasing dangerous aerosols such as cytostatics

## **INFUSION THERAPY**

### SANVIIIon

### I.V. cannula, sterile

#### features

- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines
- cannula equipped with wings and hand-closed cap of the upper port colour coded according to size
- handle that allows you to insert with one hand
- valve that prevents blood leakage to outside after inserting the cannula into the vessel
- flashback chamber secured with a Luer-Lock cap
- available in various sizes from 14 G to 26 G
- single-use
- · latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc. hard blister (PVC + lacquered paper) with a colour print in accordance with the colour identification of the size

#### indication

for cannulation of intravenous, peripheral vessels to:

- multiple injections of intravenous drugs
- intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- blood transfusions and blood-like preparations
- ensuring vascular access in the event of the need for rapid drug delivery,
- especially during diagnostic and therapeutic procedures

### **SANVIflon S**

### I.V. cannula without port, sterile

### features

- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines
- cannula equipped with coloured fixing wings, without upper port
- handle that allows you to insert with one hand
- valve that prevents blood leakage to outside after inserting the cannula into the vessel
- flashback chamber secured with a Luer-Lock cap
- available in two sizes: 24 G and 26 G
- single-use
- latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc. hard blister (PVC + lacquered paper) with a colour print in accordance with the colour identification of the size

### indication

for cannulation of intravenous, peripheral vessels to:

- mvultiple injections of intravenous drugs
- intravenous infusion of solutions
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- ensuring vascular access in the event of the need for rapid drug delivery, especially during diagnostic and therapeutic procedures

### easyFLOW IS

### infusion set, sterile

#### features

36

- 2-way sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers/bags
- air inlet with anti-bacterial filter and coloured (blue) flap
- pliable drip chamber, size 6 cm, equipped with additional pressure wings to facilitate insertion into containers with liquids
- dropper: 20 drops = 1 ml +/- 0,1 ml
- fluid filter protecting against larger particles with pore size 15  $\mu m$
- min. 150 cm-long, soft, flexible tubing with Luer-Lock conical fitting
- precise safe flow regulator with integrated holder for the closure-piercing device and with hook for securing the tubing
- name of the manufacturer placed on the flow regulator
- · both tips of the device additionally secured with protective caps
- device available in a version containing phthalates and without phthalates
- single-use
- non-pyrogenic, non-toxic
- · latex-free
- EO sterilized
- packaging: 1 pc./paper-foil with a coloured code (blue) identifying the device

#### indication

· device for fluid transfer in infusion therapy

REF	version
IS	with phthalates
IS-BF	without phthalates

### easyFLOW IS ECO

### infusion set, sterile

#### feature

- made of high quality materials
- 2-way sharp closure-piercing device of the drip chamber that guarantees tight and reliable connection with fluid containers
- air inlet with anti-bacterial filter and colored (blue) flap
- pliable drip chamber, size 4cm
- dropper: 20 drops = 1 ml +/- 0.1 ml
- fluid filter protecting against larger particles with pore size  $\,$  15  $\mu m$
- min. 150 cm-long, soft, flexible tubing
- universal Luer-Lock conical fitting
- precise safe flow regulator
- both tips of the device additionally secured with protective caps
- latex-free
- $\bullet \ \ device \ available \ in \ a \ version \ containing \ phthalates \ and \ without \ phthalates$
- packaging: 1pc./foil bag
- EO sterilized

### transfusion set, sterile

- 2-way sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with containers/bags
- air inlet with anti-bacterial filter and a coloured (red) flap
- pliable drip chamber
- dropper: 20 drops = 1 ml +/-0.1 ml
- special blood filter with large area, pore size 200 μm
- min. 150 cm-long, soft, flexible tubing
- universal Luer-Lock fitting at the end of tubing
   precise safe flow regulator with integrated holder for the closure-piercing device and with hook for securing the tubing
- name of the manufacturer placed on the flow regulator
- both tips of the device additionally secured with protective caps
- device available in a version containing phthalates and without phthalates
- single-use
- non-pyrogenic, non-toxic
- · latex-free
- EO sterilized
- packaging: 1 pc./paper-foil with a coloured code (red) identifying the device

• device used for the administration of blood and blood products

38

- made of polycarbonate
- transparent housing
- · clear optical identifier of open/close position (marked flow directions) operating in 360 degrees
- consistent, straight flow channels and an optimal internal diameter ensure correct pressure measurement
- · rotating male Luer-Lock
- all inlets protected with caps
- resistant to lipids
- latex-free, phthalate-free
- single-use
- · non-pyrogenic, non-toxic
- EO sterilized
- packaging: 1 pc./paper-foil

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- · for blood pressure monitoring
- for direct medicine/fluid supply

REF	colour	intermediate packaging
KT-002	blue	50 pcs

# 3-way stopcock with extension tube

#### sterile

#### features

- three-way stopcock with an extension tube of various lengths (from 7 cm to 100 cm)
- transparent housing
- clear optical identifier of open/close position (marked flow directions)
- three-way stopcock made of polycarbonate, extension tube made of PVC
- · all inlets protected with caps
- · resistant to lipids
- · latex-free, phthalate-free
- single-use
- non-pyrogenic, non-toxic
- EO sterilized
- packaging: 1 pc./paper-foil

### indication

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- for blood pressure monitoring
- · for direct medicine/fluid supply

### needle-free valve

#### sterile

#### features

- body made of transparent material polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface smooth and evenly ended port membrane that facilitates disinfection
- metal-free, suitable for MRI examination
- male connector of the transparent port is secured with a cap allowing for aseptic removal of the item from the packaging
- may be used for 7 days or up to 350 activations
- priming capacity: 0,09 ml
- high flow rate: 350 ml/min
- withstands injection fluid pressure of 3 bars (44 PSI)
- withstands back pressure of 2 bars (29 PSI)
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

#### indication

- intended for closing infusion ports
- device intended for multiple, needle-free injections (liquid drug administration, blood sample taking)
- protects infusion lines from contamination and infection during infusion therapy
- does not require using safety caps
- dedicated for standard Luer and Luer Lock connectors

•	REF	colour	intermediate packaging
	PB-N	blue	100 pcs
	PB-T	transparent	100 pcs

# cannula stopper

#### sterile

#### features

- precisely and safely closes standard ports
- Luer-Lock stopper has only one male tip
- combi stopper with male and female tip especially dedicated for securing Luer Lock fitting in infusion and transfusion sets
- single-use
- non-pyrogenic
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

- as a stopper of intravenous cannulas, ports and catheters
- intended to be used in combination with other devices during infusion therapy, protecting against the outflow of blood through the cannula and protecting against contamination and infection

# UROLOGICAL CATHETERS AND URINE BAGS

# **Foley catheter**

### 2-way, silicone-coated latex, sterile

#### features

- made of soft and flexible latex, that is resistant to bending and kinking
- atraumatic, soft rounded, special tip facilitating insertion
   of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic or rubber valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a guide to facilitate catheterization
- contains latex, does not contain phthalates
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

#### indication

• to drain urine from the bladder

#### with plastic valve

# urine bag

### sterile

- latex-free 2000 ml bag made of 0,22 mm thick PVC (double wall)
   double sealed PVC for maximum protection against tearing the bag
- effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing length 90 cm and 150 cm
- tubing made of material that is resistant to bending and kinking and which ensures a free and effective urine outflow
- precise, easy-to-read scale (every 100 ml), adequate for diuresis measurement
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- · latex-free
- EO sterilized
- packaging: 1 pc./foil

- for 24-hour extracorporeal collection of urine and other body fluids
- maximum time of use 24 hours

## urine bag

### with sample port, sterile

#### features

46

- latex-free 2000 ml bag made of 0,40 mm thick PVC (double wall)
- · effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing length 120 cm (other lengths available: 90 cm, 150 cm)
- tubing made of material that is resistant to bending and kinking and which ensures a free and effective urine outflow
- self-tightening port for sample taking
   precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy from 25 ml, every 50 ml from 50 ml to 200 ml and every 100 ml to 2000 ml
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- · single-use
- · latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

#### indication

- · for extracorporeal collection of urine and other body fluids
- · maximum time of use 7 days

# urine bag

### with sample port 2W, sterile

#### features

- · latex-free 2000 ml bag made of medical grade PVC
- · white back wall making urine easy to notice
- effective non-return valve
- tight T-valve, that can be easily operated with one hand and which can be folded and tucked in a hard sheath
- Pasteur type droplet chamber providing a "dry" air barrier
- two hydrophobic air filters (in a bag and chamber), which prevent sucking, balancing the pressure inside the system
- 120 cm long, large diameter tubing, ensuring a free and effective urinary outflow with a universal stepped connector
- self-tightening port for sample taking at the end of tubing
- tubing equipped with a sliding clamp and a fastening pin to stabilize
- at the place where the tubing connects to the chamber, an additional reinforcing element prevents bending and kinking the tubing
- · precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy, every 25 ml from 25 ml to 100 ml and every 100 ml from 100 ml to 2000 ml
- tag to describe the patient's details and date
- integrated universal hanger system matching the round and square bed rails
- · additional fixing with a string
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

• device is intended for 14-days urine collection in a closed system

REF	capacity	length of tubing
WM2T2000-120	2000 ml	120 cm

# samples taking urine bag

#### sterile

#### features

- latex-free bag with a capacity of 100 ml, size 19 cm x 7 cm
- made of delicate, durable PE foil
- easy-to-read scale, adequate for diuresis measurement, highly accurate every 10 ml
- · adhesive part of the bag coated with anti-allergic, high-quality glue
- · additional sealing made of anti-allergic foam that protects against the wall sticking of the bag, thanks to which free flow of urine is possible
- single-use
- · latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./foil

#### indication

• for urine sample collection in infants and small children

# enema bag

### sterile

### features

- · bag with a capacity of 1750 ml with two holes for hanging
- made of medical PVC
- scaled from 50 ml to 1750 ml
- linear scale every 100 ml, digital scale every 200 ml
- tube with a length of 150 cm with a sliding clamp, ended with an atraumatic opening and one lateral opening
- tube end is secured with a tube cap
- upper part of the bag is reinforced with an additional flange
- stabilizing the inlet during filling with liquid
- flange is equipped with a non-return valve
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./foil

• bag that allows introduction of fluid into the large bowel through the anus to remove fecal material and stimulate peristaltic

WLS

### enema bag

#### non-sterile

#### features

- bag with a capacity of 1500 ml with a hole for hanging
- made of medical PVC
- digitally scaled every 250 ml
- tube with a length of 115 cm with a sliding clamp, ended with an atraumatic opening and one lateral opening
- greased end of the tube secured with a cap
- single-use
- latex-free

# vomit bag

#### non-sterile

#### features

- bag is made of durable, transparent blue foil, enabling the observation of secretions
- total bag capacity: 2000 ml
- exact measuring graduation (from 10 ml to 100 ml every 10 ml and from 100 to 2000 ml every 100 ml) placed on the bag allows accurate estimation of fluid volume
- direction of graduation reading for small volumes is marked with the tip
- wide bag inlet protected by a plastic collar
- circle-shaped collar ensures a firm grip, makes it easier to maneuver the bag, reducing the risk of content contamination
- collar equipped with a special incision to close the bag and hygienic disposal of the vomit "twist and hook"
- device name, manufacturer's name and pictorial instructions for use printed directly on the bag
- single-use
- latex-free
- phthalate-free
- class I non-sterile medical device
- packaging: 20 pcs/foil bag

- recommended in uncomfortable situations, in cases of gastroesophageal reflux requiring immediate action
- · used in hospitals, outpatient departments, ambulances, etc.

### nebulizer

# with T F/M adaptor, mouthpiece, corrugated tube and tubing, sterile

#### features

- made of non-toxic materials
- 210 cm long, bend-resistant tubing with star-shaped cross-section
- nebuliser, tubing, T-adaptor, mouthpiece, one-way valve and corrugated tube included in a kit
- universal T-adaptor with a diameter of 22M/15F 22F enables the kit to be connected to endotracheal, tracheostomy tube or breathing circuit and perform nebulisation on mechanically ventilated patients
- the universal (detachable) mouthpiece allows nebulisation to be given to patients who are breathing on their own
- silicone one-way valve (detachable) reduces medication waste during nebulisation
- single-use
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./foil

#### indication

- device is designed to produce an aerosol containing fragmented medication, which can be delivered deep into the respiratory system with the patient's inhalation
- enables nebulisation to be carried out in mechanically ventilated patients by connecting directly to the endotracheal tube, tracheostomy tube or inspiratory arm of the ventilator breathing system
- allows you to perform nebulisation in patient "on one's own breath"

#### features

- made of high quality EVA material, without PVC
- 15F/22M and 22F universal connector fits compatible products and devices for mechanical ventilation or anesthesia machine
- expandable arms with maximum length of 160 cm
- adjustable length of circuit enabling adjustment of length of respiratory system and optimization of dead space
- equipped with latex-free breathing bag: 3l (for adults) or 1l (for children)
- additional expandable tube, length: 100 cm
- elbow with Luer-Lock port
- single-use
- latex-free, phthalate-free
- EO sterilized
- · packaging: 1 pc./foil

#### indication

- for patient's mechanical ventilation
- it enables transporting breathing mixture from equipment (ventilator, anesthesia machine) to respiratory protection device (e.g. tracheal tube, tracheostomy mask) and vice versa

REF	purpose	capacity of bag
OBWD-1601L	for children	1 liter
OBWD 16031	for adults	2 litors

# catheter mount with double swivel elbow connector

#### sterile

#### features

- smooth bore type made of medical PVC
- expandable type made of high quality PE, EVA
- universal patient connection: 22M/15F
- ventilation device side connector: 15M or 22F
- expandable version characterized by shape memorizing and by the ability to control the position of the connector
- double swivel elbow connector
- port for suctioning and bronchoscope secured with a stopper
- available in versions: smooth bore and expandable
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

- used to connect the tracheostomy tube or endotracheal tube with the breathing circuit of the ventilation device
- provides greater mobility and rotation of the connection, increasing patient comfort and safety

### oropharyngeal airway/guedel airway

#### sterile

#### features

- made of high quality PE (polyethylene), free of PVC
- distinctive anatomical curve of airway tube allows for the opening of the upper respiratory tract and the free flow of anaesthetic gases, air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- latex-free, phthalate-free
- EO sterilized
- · packaging: 1 pc./foil

#### indication

- used during artificial ventilation procedures to ensure the airway patency
- as a tool for paramedic to assist in the management of a casualty's airway which increases the effectiveness of the rescue operation
- facilitates the stabilization of the endotracheal tube and protects it against biting

### air cushion anaesthetic mask

#### non-sterile

#### features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- retaining ring can be removed when it is not needed
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient's face
- single-use
- · latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

- intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient

### surgical suction tube

#### sterile

#### features

- made of soft and flexible PVC
- along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
- perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow
- connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)
- funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
- tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection
- single-use
- latex-free
- · EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

#### indication

- device designed for connecting the suction cannula to medical suction device
- Kapkon connector designed to connect the catheter for aspiration of upper respiratory tract to medical suction device

# OTHER PRODUCTS

# tactical tourniquet CAT

#### non-sterile

#### features

66

- made of soft and breathable material to prevent chafing and skin burns
- additional element to secure the tourniquet and control blood flow
- locking system to prevent accidental opening of the tourniquet
- · one-handed mechanism
- durable loop system with internal, free-moving strap that provides circumferential compression to the limb
- the unique double fastening system allows to avoid the use of screws and clips
- high quality of workmanship
- place to write down the time of establishment
- weight: 82g
- folded dimensions: 16 cm x 6 cm x 4cm
- unfolded dimensions: 96 cm x 4 cm
- · individually wrapped in foil packaging
- latex-free
- · phthalate-free
- single-use
- · non-sterile

#### indication

• tactical tourniquet used in case of limb injuries with massive arterial or venous bleeding that cannot be controlled by traditional techniques

REF	dimensions	intermediate packaging
ST-001	96 cm x 4 cm	1 pc.

## automatic tourniquet

#### non-sterile

#### features

- components: blue stretchy strap and white ABS plastic buckle
- length 480 mm +/- 10 mm, width 25 mm +/- 10 mm
- wide, stretchable band put above the venipuncture site reduces the pressure intensity
- $\bullet\,$  protects against the congestion of the arm, minimizes unpleasant
- sensations, improves the quality of the blood sample
- reusable
- contains latex, phthalate-free
- non-sterile
- packaging: 1 pc./double packaging: internal- foil, external- box

#### indication

• used to induce venous stasis and to make a vein selected for puncture more prominent

REF	intermediate packaging
SA-001	21 pcs

### for children

#### features

- components: polyester stretch strap and ABS plastic items
- length 450 mm +/- 5 mm, width 25 mm +/- 1 mm
- wide stretch strap to minimise pressure build-up during compression
- significantly protects against arm congestion, improves the quality of the blood sample for examination
- reduces unpleasant sensations during compression
- a simple one-handed mechanism for easy fastening and unfastening with gradual release of pressure
- latex-free
- phthalate-free
- reusable
- non-sterile
- shelf life: 5 years

#### indication

• device used to induce venous stasis and to make a vein selected for puncture more prominent

REF	intermediate packaging	intermediate packaging
SA-002	21 pcs	yellow + imprint

### latex-free tourniquet

#### non-sterile

#### features

- made of a wide stretch TPE strap (thermoplastic elastomer)
- latex-free material prevents allergic reactions and skin irritation
- high tensile strength
- single-use bands reduce the risk of infection
- total roller length 11,25 m
- single-use
- latex-free, phthalate-free
- individual packaging contains: 25 tourniquets
- non-sterile
- packaging: 1 roll/paper dispenser that allows convenient sharing of perforated tourniquets

#### indication

• used to induce venous stasis and to make a vein selected for puncture more prominent

REF	size	colour

bulk packaging:

### dental brush

### with suction, non-sterile

#### features

- · made of polypropylene
- soft bristles on one side, foam on the other side
- total length 18 cm
- length of the cleaning part 2,5 cm
- suction opening from both the bristle side and the space between the foam and the bristles
- controlled suction connector at 45° angle for convenient manipulation
- single-use
- latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

#### indication

- hygiene of the patient's oral cavity
- function for simultaneous brushing, rinsing and suction

REF	intermediate packaging	
HJM-SO	50 pcs	

bulk packaging: 10 x 50 pcs

#### oral swab

#### non-sterile

#### features

- overall length 15 cm (+/- 2 mm)
- length of the foam part 2,5 cm
- handle made of polyester
- swab made of polypropylene
- single-use
- latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

- intended for oral hygiene in patients partially or completely dependent on medical personnel
- allows the oral mucosa to be kept in proper humidity
- allows you to perform a procedure to prevent pathological changes in the mouth

REF	intermediate packaging	
HJM-G	B 50 pcs	

# tongue depressor

#### wooden

#### features

- · made of birch wood
- rounded edges preventing injuries
- natural colour
- long outreach thanks to appropriate length
- durablesingle-use

68

- available in sterile or non-sterile version
- packaging: sterile 1 pc./paper, non-sterile 100 pcs/box

OPD-B-01	for children and adults	white	insert card	100 pcs
OPN-R-01	for infants	pink	insert card	100 pcs
OPN-N-01	for infants	blue	insert card	100 pcs

### non-sterile

#### features

- blue mat consisting of 30 layers thin sticky sheets
- each of the sticky sheets made of polyethylene resin
- does not contain heavy metals

entrance mat

- excellent adhesive properties
- the first and last sheets secured with a non-adhesive foil
- low mat profile: app. 2 mm thick
- the bottom surface adheres very well to the floor over the entire surface, preventing adverse movement of the mat, allowing trouble-free passage
- of trolleys with equipment or beds, without the risk of curling up the mat or tearing no need to clean the mat as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean sheet
- there is numbering of sheets on a white non-adhesive material in the mat corner facilitate quick identification and easy removal of subsequent sheets
- light, easy to spread
- · non-sterile

#### indication

• preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

REF	dimensions	intermediate packaging	
M001	45 cm x 115 cm	10 pcs	

#### features

- made of polyethylene
- coarse surface and tear-resistant weld
- ambidextrous
- elongation min. 130%, tensile strength min. 10 MPa
- approved for contact with food
- single-use
- non-sterile
- packaging: 100 pcs/foil bag enabling individual removal of gloves

#### indication

• intended for use as a contribution to other gloves (double-gloving) and for minimally invasive procedures such as drug preparation, feeding the patient

REF	size	length	
BS-RF-M	M (women)	280 mm	
BS-RF-L	L (men)	300 mm

### electronic thermometer

#### non-sterile

#### features

- · digital thermometer
- · fast, safe and reliable
- temperature readings
- waterproof
- measurement in 10 seconds
- range 32.0°C-42.9°C (90.0°F-109.9°F)
- accuracy ±0.1°C (±0.2°F)
- has a soft, flexible measuring tip
- sound signal
- automatic turning off
- memory of the last measurement
- low battery indicator
- battery life: approximately 200 hours
- package: 1 piece / plastic cover and paper box

#### indication

• for measuring body temperature in the mouth, armpit and rectal area

### medicine cup

#### non-sterile

#### features

- made of BPA free polypropylene
- transparent material of the cup allows observation of the administered medication
- · capacity 30 ml
- precise, easy to read linear scale in 1 ml increments, numbered in 5 ml increments
- rounded rim of the cup increases comfort during contact with the patient's mouth
- improved cup holding function due to the stable top edge
- special ribbing reinforcing the construction of the cup and allowing easy capacity reading
- upper diameter : ~40 mm
- bottom diameter: ~27 mm
- height: ~42,5 mm
- available colours: transparent, yellow, blue, red, green
- manufacturer's name embossed on the cup
- latex-free
- · phthalate-free
- single-use
- non-sterile
- shelf life: 5 years

#### indication

• disposable device intended for the administration of liquid or solid medicines

### medical waste container

### non-sterile

#### features

- lid equipped with a rosette insertion hole and two holes to separate blades from handles, needles from syringes, etc.
- dual-function lid for temporary or permanent closure of the container
   high resistance to mechanical deformation
- manufactured in red warning colour, other colours (yellow, blue) available on request
   supplied with a BML-type label, injected during blowing, with an international warning sign
- and place for easily writing the waste data, even with a pen
- resistant to UV radiation, formalin and ethyl alcohol
- it is approved by the National Institute of Public Health
- according to the requirements of the standards: ASTM F2132-01 (puncture resistance) and EN ISO  $1\overline{7}5$  (resistance to immersion in liquid chemicals)
- latex-free, phthalate-free
- single-use
- · non-sterile

- intended for the collection of solid, hazardous medical waste such as needles, intravenous cannulas, syringes, disposable gloves, etc.
- the container enables the safe storage, transport and disposal of medical waste, ensuring safety in terms of hygiene and sanitary standards, as well as mechanical safety to prevent unwanted events such as punctures and cuts when medical staff dispose of sharp waste.

# **Dressings**

Dressing materials have for years been the core of patient care. Constant development in this field causes more advanced products to appear next to the basic ones only. Dressing does not translate into using only the basic compresses and tapes any more. Naturally the function of each dressing depends on the requirements, overall patient health and the conditions in which the product is to be used.

The offer of ZARYS Inernational Group falls into a few categories and encompasses a complex range of solutions such as:

 gauze and non-woven dressings, compresses and drapes whose main function is to absorb the exhudate and dress the wound in hospital and home care conditions,

- adhesive tapes made of various materials used for dressing and drain fixation as well as dressings with absorbent pads that enable fast dressing of minor injuries,
- special purpose dressings composing of solutions dedicated to specific conditions such as the dressing of post-operative wounds, cannula and drain fixation,
- supporting dressings- including products such as knitted and elastic bandages and tapes,
- stiffening dressings- including padding and P.O.P. bandages.

# TRADITIONAL DRESSINGS MATERIALS

### **GAUZE AND NON-WOVEN** DRESSINGS

### **DRESSING GAUZE**

### features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- soft and very absorbent
- $\bullet\,$  increase in absorption capacity with increasing number of gauze threads
- homogeneous structure through a strong twist of fibers eliminates the risk of loose fibers on the surface

• general wound dressing in out-patient clinics, surgical sites, procedure department

### **GAUZE LAP SPONGES**

### features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- with a sewed in X-ray detectable thread or chip, which enables fast and non-invasive identification of the lap sponge left in the operating field
- with a belt to fix the lap sponge beyond the operating field

### indication

• as a surgical invasive dressing material for intraoperative absorption of large amounts of blood and body fluids from surgical wounds

Before use on open wounds, the device must be sterilized in accordance with a validated sterilization method. It can be sterilized with steam or ethylene oxide.

### **HOW TO CHOOSE A DRESSING PROPERLY?**

When choosing the proper type of dressing, pay special attention to:

- absorption rate and absorption capacity,
- vapor permeability,
- possibility of an atraumatic dressing change,
- safety of use.

### SELF-ADHESIVE DRESSINGS FOR KIDS

- self-adhesive dressing with absorbent pad, made of hydrophobic non-woven material with color overprint, covered by hypoallergenic glue
- · absorbent pad coated with polyethylene mesh to prevent sticking to the wound, absorbing small and medium amounts of exudate and protecting against external influences
- rounded edges to prevent accidental removal of the dressing
- protective layer of silicone paper for precise, painless and effective application
- · micropores in the non-woven material structure provide an adequate rate of moisture vapour permeability so correct gas exchange between the dressing and skin is guaranteed

# non-woven IV cannula dressing

### elastoKIDS IV

### FIRST AID FOR DRESSING WOUNDS USING BANDAGES

Hippocrates' achievements in treating head wounds were so widespread and advanced that they are still used today. The Hippocrates cap also called "mitra is a headgear that allows you to hold the dressing and stop bleeding of the head wound. It is made of two bandage tapes. The main purpose of using the Hippocrates cap is to hold the dressing directly protecting the bleeding head wound, seal and warm the head, hold the compress applied to the skull area, compression, strengthening and immobilization after surgery and additional protection against the external environment. This solution is used in the absence of access to dressings such as elastic dressings and scarves.

How to make a HIPOCRATES CAP?

### **RULES FOR BANDAGING**

- Prepare a two-head bandage about 5-6 cm wide by sewing together two bands or by twisting the free end to the middle.
- Put the two-headed bandage on the back of the head and drive bandage to the forehead a circular move.
- 3. Cross the bandages on the forehead and drive one through the top of the head towards the occiput by a longitudinal move.
- 4. Drive the other bandage above the ear to the occiput also (half-round).
- 5. Scroll the longitudinal course through the circular course bandage.
- 6. Drive back the longitudinal course bandage across the top of the head to the forehead.
- 7. Drive the circular course bandage around the other ear to the forehead
- 8. Continue longitudinal and circular moves, the circular course bandage wraps around the scalp
- 9. Little by little, move the longitudinal course bandage towards the temples
- 10. After covering the whole area with a two-head bandage, fix the ends of bandage

### **ORTHOPEDIC PADDINGS**

### features

- very soft and fluffy
- adhere well and adjusts to the shape of the body
- · coherent structure resistant to stratification makes it easier placement of the immobilizing dressing
- minimize the risk of skin abrasions and irritations under the P.O.P. bandage
- do not absorb moisture and thus do not allow for its contact with the skin
- hypoallergenic

### indication

- as a protective layer put under plaster of Paris bandages
- in compression therapy as a padding under the bandages of various elasticity

### triangular sling

### **elastoSLING**

non-sterile

### features

- triangle shaped sling made of non-woven or cotton
- thin, light and elastic comfortable for the patient, adjusts to the shape of the body, provides freedom of movement
- possibility of connecting several slings to achieve bigger immobilization
- hypoallergenic

### indication

 short-term immobilization and support of the upper limb in case of various injuries e.g. dislocation or fracture of collar bone, humerus, forearm or hand bone

REF	dimensions	description	packaging unit zipper pouch	bulk packaging foil bag
CHTW9696136	96 cm x 96 cm x 136 cm	non-woven	1 pc.	12 x 1 pc.
CHTB9696130	96 cm x 96 cm x 130 cm	cotton	1 pc.	12 x 1 pc.

### **HOW TO PROPERLY PUT ON A TRIANGULAR SLING?**

- 1. Place the triangular sling on the patient's body so that one of the corners of the sling is at the level of the elbow of the immobilized hand.
- 2. Place the second corner of the sling on the opposite arm in relation to the immobilized hand.
- 3. Carefully place the sick / injured limb on the sling.
- 4. Wrap the sick/injured limb with dangling, third corner of the sling.
- 5. Make sure that the hand is in the right position, and then tie the corners of the sling around the neck.

### P.O.P. BANDAGES

### features

- made of cotton gauze coated with natural plaster of Paris on both sides
- on a plastic roll
- enable fast and durable immobilization
- before fixing need to be soaked in a container with water at 20°C temperature
- do not absorb X-rays

### indication

100

• large and small immobilizing dressings in orthopedic, ambulatory and surgical procedures

### 101

### **RULES FOR BANDAGING**

Select a bandage of proper type and size for the part of the body to be bandaged.

\* incorrectly

With your right hand, grasp the beginning of the band, and with your left hand hold the rolled part so called "head".

Put the patient in a comfortable position supporting the bandaged lower or upper limb.

For proper stabilization of dressing, start bandaging with a circular wrap, each subsequent layer covers exactly the previous one in a durable and aesthetic way. Little by little unroll the band during bandaging. Finish the bandaging with a circular wrap, end of the dressing secure with a clip or tie it.

The bandage should adhere correctly to the patient's body and be rolled up with adequate power – too much pressure can lead to impaired circulation, too loose it will slide and fall.

Remove the bandage by transferring it from one hand to other to minimize patient movement.

# SPECIALIST DRESSINGS

### paraffin gauze dressing

### paraffiNET

sterile

### features

- wide-mesh dressing made of cotton gauze covered with paraffin
- structure of the carrier material allows exudate to be freely drained to the covering secondary dressing
- covering with a layer of paraffin reduces risk of adhesion to the wound and allows a painless change of dressing
- neutral properties of paraffin allow for using the dressing in combination with other preparations containing medicinal substances or antiseptics
- · can be shaped and cut according to the needs aseptically
- needs to be covered with a dressing with absorbent properties, e.g. compress, high-absorption dressing, polyurethane foam
- non-adhesive, necessary fixing with a tape, bandage or net tubular dressing
- hypoallergenic

### indication

- keeping proper moisture in the wound
- $\bullet\,$  preventing the wound edges from dying and maceration
- recommended for uninfected wounds
- · treatment of chronic wounds: various ulcers, bedsores
- treatment of surgical and burn wounds, skin donor and grafting sites, skin damage, cuts
- protection against radiation skin damage

### A NEW APPROACH TO WOUND HEALING

The most important factor affecting the effectiveness of wound healing is maintaining constant humidity within the wound. George D. Winter is a precursor of wet wound therapy, who in 1962 published his observations after experiment of creating a moist environment under polyurethane film and observing wound healing. Experience has shown that the wound heals under these conditions twice as fast as in unprotected conditions with a special film dressing.

Maintaining a moist environment in the wound stimulates the self-cleaning process, facilitates the autolysis of dead tissue, granulation growth, reduce the healing time.

It also prevents the dressing from sticking to the wound, allowing it to be changed without pain. While removing dressing there is no secondary tissue damage.

104

### **FOIL DRESSINGS**

### features

- made of polyurethane film
- covered with hypoallergenic acrylic glue
- transparent they allow observation of the dressed place without the need to remove the dressing
- vapour permeability guarantees correct gas exchange between the dressing and the skin, and prevents it from
  excessive moisture accumulation and maceration
- barrier against microorganisms and bacteria, minimizing the risk of infection
- very thin and elastic adjust to the shape of the body, guarantee freedom of movement
- waterproof
- self-adhesive
- hypoallergenic

### Remove the back paper protection.

# foil dressing

sterile

### features

- "frame" or three-stage" application system makes dressing placement precise and accurate
- available in several sizes and options:
  - with a central absorbent pad
- with notch enabling the dressing to fit the cannulas
- without notch and absorbent pad

2. Apply the dressing to the desired place.

no.	quantity	component	specification	individual packaging
1.	2 pcs	examination gloves, nitrile, powderfree in paper packaging	size. M 100% nitrile; light blue colour	
2.	1 pc.	examination gloves, nitrile	size. L 100% nitrile; white colour	1 kit
3.	2 pcs	post-injection dressing, self-adhesive	3cm x 7,2cm polyethylene film; transparent	hard blister
4.	6 pcs	non-woven swab	7,5cm x 7,5cm non-woven 30G, 4 ply; colour white	

## DS-DIA-O-02

## **DIALYSIS ON/OFF KIT 2**

sterile

## features

- single-use
- for short-term use
- shelf life: 3 years
- label with 2 adhesive tag labels for data archiving; the following information is available on each adhesive tag label: REF number, expiry date, batch number, manufacturer's data and barcode
- packaging: two-piece soft blister with perforation, paper-foil

## indication

- intended for use in treatment rooms, emergency services or hospital wards
- it contains auxiliary disposable medical devices necessary to perform the puncture procedure e.g. central venepuncture, subarachnoid puncture

## **PROCEDURE SETS**

Operating theatre is a specific environment where time is the most valuable factor influencing the success of the operation. It is a place where every minute - or even a second - counts, because it can affect the patient's life. To meet the expectations of medicine, ZARYS introduces operating sets to its offer that meet the highest standards, helping to improve the preparation of the operating theatre before the procedure

## **ADVANTAGES** of using omegapack operating sets

## TIME

unpacking the set and preparing the operating theatre takes about

### **30**%

less time than selecting individual products and improving work at operating bLock

## **REDUCING**

## COST

## **QUALITY**

properly selected composition of the set according to individual needs for a specific medical procedure in line with the Customer's order

## **EPIDEMIOLOGICAL SAFETY**

reduced risk of patient infection by minimizing the time of contact of medical staff with devices during the preparation of the theatre and the patient

## **ENVIRONMENT**

the amount of generated waste is reduced to a minimum

one packaging

reduced number of supplies, saving space in the warehouse

## **EFFECTIVENESS**

increasing work productivity, so that you can perform more surgical procedures in one day, improvement of work of medical staff

## STANDARDIZATION OF PROCEDURES

correct and schematic conduct during the procedure,

one package - one treatment

## **EASY RECORD KEEPING**

optimization of record keeping - one self-adhesive label with the identification of the used set, instead of each used product separately

## **REDUCTION OF ERRORS**

the complete set contains all disposable medical devices necessary for the surgical operation, which eliminates the possibility of errors during the selection of individual products

## WIDE RANGE OF PRODUCTS

a wide range of medical devices selected individually in accordance with the Customer's preferences

# The sets are assembled on the basis of individual requirements and preferences of Customers

Medical devices under the omegapack brand by ZARYS are operating sets containing complete equipment with all disposable products necessary to perform a given medical procedure to which the set is dedicated. The operating set contains carefully selected disposable components, such as:

- surgical drapes, pads
- accessories, e.g. fluid collection bags, tapes
- surgical gowns
- surgical gloves
- covers for equipment
- shoe covers, masks, caps

- gauze balls
- gauze and non-woven swabs bandages, dressings
- catheters, urine collection bags
- trays, bowls
- taps, three-way stopcocks
- manifolds, connectors
- infusion sets
- suction sets
- disposable surgical instruments
- injection needles and syringes
- disposable electrosurpicel electrodes and accessories
   and many more

## PROTECTIVE COVERALL SAFE+

## AGAINST CHEMICAL AND INFECTIVE AGENTS TYPE 4b - 5b - 6b

Personal protective equipments (PPE) are products that protect against one or more risks to the user's health or safety. These products must comply with Regulation (EU) 2016/425 of the European Parliament and of the Council. PPE is classified into three categories according to the degree of risk.

The coverall is a PPE category III in accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council

The category III covers products of complex construction, intended to protect health or life against risks that may cause death or irreversible damage to health.

#### Standards:

Coverall is personal protective equipment of category III in conformity with Regulation (EU) 2016/425 of the European Parliament and of the Council

EN ISO 13688:2013 Protective clothing. General requirements

EN 14605:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for clothing with liquid-tight (Type 3) or spray-tight (Type 4) connections, including items providing protection to parts of the body only (Types PB [3] and PB [4])

EN ISO 13982-1:2004+A1:2010 Protective clothing for use against solid particulates. Part 1: Performance requirements for chemical protective clothing providing protection to the full body against airborne solid particulates (type 5 clothing)

EN 13034:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals (Type 6 and Type PB [6] equipment)

EN 1073-2:2002 Protective clothing against radioactive contamination. Part 2: Requirements and test methods for non-ventilated protective clothing against particulate radioactive contamination

EN 14126:2003 + AC:2004 Protective clothing. Performance requirements and tests methods for protective clothing against infective agents

class 6 Resistance to penetration of contaminated liquids under the influence of hydrostatic pressure class 6 Resistance to penetration by infective agents due to mechanical contact with substances class 3 Resistance to penetration of contaminated liquid aerosols

class 3 Resistance to penetration of contaminated solid particles

EN 1149-5:2018 Protective clothing. Electrostatic properties.

Part 5: Material performance and design requirements

EN 14325:2004 Protective clothing against chemicals. Test methods and performance classification of chemical protective clothing materials, seams, joins and assemblages

#### features:

- made of a laminate (non-woven polypropylene and polyethylene) with a weight of 63  $\rm g/m^2$
- · polyester seams additionally covered with tape
- · equipped with a hood with elastic trim
- equipped with an elastic waist band, wrists and ankles
- zipper covered with a self-adhesive flap
- available in version with boots

# Surgical sets, drapes and surgical gowns

Preventing infections in the operating field is a priority for all medicals. Thanks to our complex offer of single-use protective solutions of ALPHAtex STANDARD, STANDARD+, COMFORT, the post-procedural complications and risk of infection in the operating field are minimized while increasing the protection barrier against the potentially pathogenic germs residing in the human skin layers. We offer:

- patient and equipment drapes
- sets of surgical drapes
- incise films
- surgical covers
- adhesive tapes
- accessories such as fluid collection pouches
- surgical gowns

Properly selected features of surgical drapes provide safety and comfort of use to medical staff and patients. A variety of multi-layer non-woven and laminates reinforced in critical areas in lines STANDARD+ and COMFORT allow to adjust our solutions to particular surgical procedures with maximal cost efficiency.

ALPHAtex products are characterized by parameters frequently exceeding the requirements of EN 13795 for 'Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment'.

Moreover, they provide a successful protection against the risk of infection in the operating field. Practical solutions and composition of our sets enable their quick and simple application while performing medical procedures.

# Prevention of surgical site infection

## Surgical site infection (SSI)

is defined as infection occurring up to 30 days after surgery, when there is a possibility of microorganisms penetration into the open surgical wound. Microorganisms could have various sources EXOGENOUS (carried by an external factor as medical staff or medical devices) or ENDOGENOUS (patient's bacterial flora from the closest area surrounding the surgical postoperative wound). The most important routes of infections are airway or contact path. Various type of barriers are used to minimalize the surgical site infections: surgical drapes, surgical gowns and medical equipment covers.

## **Surgical drapes**

(the names are based on the EN 13795 standard)

Surgical drapes are used to ensure clean microbiological surgical wound surrounding, minimalize the microorganisms migration from patient skin to surgical wound and to supervise the spreading of body fluids from the wound area. Surgical drapes meet the requirements of medical device in accordance with the Directive 93/42/EEC.

## **Surgical gowns**

(the names are based on the EN 13795 standard)

Surgical gowns are used to prevent direct microorganisms transmission from medical staff to patient. Moreover, surgical gowns prevent spreading of exfoliated epidermis in the air of the operating room.

The wide range of ALPHAtex products it's an effect of over 30 years of ZARYS International Group existence on medical market. Sharing our experience and knowledge we are convinced that using ALPHAtex products will provide comfort, safety and economic effectiveness during daily work in the operating room.

## **Complex offer of ALPHAtex products contains:**

## **ZONES OF SURGICAL DRAPES ON PATIENT**

on the operating room

## **Surgical sets ALPHAtex**

contains different disposable medical devices

## **ALPHAtex label**

## Features of disposable surgical drapes ALPHAtex used in the operating room

## **SURGICAL DRAPES**

## **BASIC TYPES OF MATERIALS USED IN SURGICAL DRAPES:**

PF DRAPE - two layer material of the drape containing absorbency layer of celulose on top and PE foil layer of the drape on back

NF, NFA, NFFA, NFFAR DRAPE - two layer material of the drape containing absorbency layer of non-woven material on top and PE foil layer on back of the drape

NFN, NFNA, NFNF, NFNFA DRAPE - three layer material on the drape containing absorbency non-woven layer on top, PE foil layer in the middle and non-woven absorbency layer on the back of the drape

### **TRUE OR FALSE?**

"I am too young / too old for hip replacement."

### **NOTHING COULD BE MORE** WRONG!

Hip endoprosthesis is performed in patients from a wide age range. Very important is patient condition, however this is only one factor which classifies patient for procedure.

### Standard EN 13795-1:2019

Essential requirements for surgical drapes and surgical gowns results from directive 93/42/EEC and have been included in EN 13795 standard "Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment". The purpose of EN 13795 standard is to maintain stable level of surgical drapes and surgical gowns safety for whole using period as well as minimalization of direct microorganisms transmission from medical staff to patient during surgical procedures.

# **Medical clothing**

It is extremely important for us to offer our clients products that ensure high standards of working conditions and comfort of use.

In order to achieve this goal, we have created a line of high quality products made of different types of non-woven materials:

- polypropylene non-woven
- SMS non-woven
- Spunlace non-woven
- viscose non-woven
- Spunlace Mesh non-woven

A combination of several factors such as optimal design, perfect fit, breathability and structure makes BETAtex products comfortable and reliable. A wide range of solutions will certainly meet our clients' individual preferences and secure both medical personnel and patients' comfort and dignity.

# Cohesive bandages, kinesiotapes and others...

yellowSPORT is a brand offering comprehensive solutions in the field of sports medicine according to the best practices that have been developed during physical activity tests. Based on the knowledge and experience of experts, the product line is dedicated not only to sportswomen and sportsmen but also to people taking their first steps to improve their physical activity (recreation).

yellowSPORT is primarily a tribute to, among others, physiotherapists, personal trainers, medical staff, sports clubs and owners of rehabilitation clinics. It creates an excellent base and product base while maintaining the expected ratio between cost and required quality.

The offer of products from the **yellow**SPORT family was prepared by specialists in the field of medical devices and physiotherapy. Therefore, from the very first day of its presence on the market, the "yellow brand" is a concrete response to the real needs of users, regardless of the level of advancement in the field of physical activity or just recreation.

don't be shy, be yellow

# yellowBAND

#### **COHESIVE BANDAGE**

#### **USE:**

- fixation of all types of non-adhesive dressings, especially where the elastic band slides
- fixation of splinting rails
- in compression therapy
- reducing joints mobility after an injury

#### **FEATURES:**

- 1-layer, breathable, made of non-woven
- cohesive it coheres to itself, does not adhere to skin, hair or other materials
- ✓ latex-free

#### **AVAILABLE SIZES AND COLOURS:**

# yellowTAPE

#### **KINESIOTAPE**

#### **USE:**

- kinesiotaping (dynamic taping)
- ensures nutrition of tissues and accelerates their recovery
- improves the biomechanics of movement without restraining joint's mobility
- reduces pain by affecting sensory receptors

#### **FEATURES:**

- ø elastic, breathable tape made of cotton
- wave-like acrylic coating

# Palou Palou Pan

#### **AVAILABLE SIZES AND COLOURS:**

don't be shy, be yellow CHECK THE PRODUCT

# yellowRIGID TAPE

#### SPORTS TAPE, LINE GLUE COATING

#### USE:

- athletic (rigid) taping
- sports injuries prevention
- protecting the joints from excessive mobility after the injury, which allows for activity continuation
- protection of the areas exposed to abrasions

#### **FEATURES:**

- non-elastic, breathable tape made of cotton
- acrylic coating
- serrated edges no need for scissors
- alternate arrangement of the stripes covered with glue and those without it form grooves that allow free sweat and water flow that reduces the tape's sensivity and increases its resitance to environmental conditions

#### **AVAILABLE SIZES AND COLOURS:**

YRT-2591-W

YRT-3891-W

YRT-591-W

2,5cm x 9,1m

3,8cm x 9,1m

yellow

# yellowWRAP

#### **FOAM UNDERWRAP**

#### **USE:**

- skin protection during athletic taping
- ensuring correct base for athletic taping in hairy areas
- $\hspace{-0.5cm} \hspace{-0.5cm} \hspace{-0.5$

#### **FEATURES:**

- made of polyurethane foam
- porous structure allows for air flow and moisture drainage

# AVAILABLE SIZES AND COLOURS: YW-07-S

7cm x 27m

# yellowFOAM

#### **FOAM TAPE**

#### USE:

204

- stabilization, protection and fixation of non-adhesive primary dressings put directly on wounds or injured skin
- protection of the areas exposed to abrasions when the epidermis is undamaged e.g. while wearing new shoes or another equipment

#### **FEATURES:**

- waterproof tape made of polyethylene foam
- acrylic coating

#### **AVAILABLE SIZES AND COLOURS:**

### scissors

#### **FOR SPORTS TAPES**

#### USE:

for cutting sports tapes or other adhesive tapes

#### **FEATURES:**

- sharp blades ensure precision of the cut
- covered with teflon preventing the tapes from adhesing to the blade
- ø ergonomic shape fits perfectly in hand ensuring comfort
- Iength of the blade: 21 cm

**REF number: YC-X** 

# yellowBOX

#### **DISPENSER FOR KINESIOTAPES**

#### **USE:**

- storing and transporting of tapes
- protects from contamination and damage
- "rolling" core makes it easy to cut the desired length of tape

#### **FEATURES:**

- made of hard PVC
- ∮ suitable for tapes of 5 cm width
