DGM Testing Charge

DGM(Dangerous Goods Management) is used for checking the safety of the classified goods before embarking on any air transportation. It is divided into four categories of testing: chemical/liquid/oil, magnetic/motor, pressure and battery testing.

That's why our general lab instruments are obviously not dangerous goods but still require this DGM inspection everytime. Our products belong to two categories:

Magnetic / Motor: Stirrers / Homogenizers / Shakers / Rotary Evaporators
Motor / Pressure: Pump

One DGM Insepcting Charge is USD 80.00.

In addition, It would be charged seperately by product name, even in one shipment.
