

Manual Hospital Bed S231(LN)

Functions	2 functions
Certificates	CE,FDA,ISO9001, ISO13485
Equipment classification	Class I
Origin	Made in China

Description

1.What is a manual hospital bed ?

A manual hospital bed is a medical bed which achieves different adjustment manually through various crank mechanism.

It could be designed for 1/2/3 functions accordingly to tailored crank mechanism.

Manual handles usually can be folded out of the way at the foot of the bed to prevent injuries.

It is operated by nursing staff(caregivers),not by patients themselves only with permission from nursing staff.

Technical Parameters

MANUAL BED (2 CRANKS)

Main functions:

A:Back section up/down .

B:Knee section up/down.

Related parameters:

Overall dimension:

L2100*W960*H550 ± 10 mm
