

VISOR

Product Description:

A face protection mask prevents particles, saliva, droplets, dust and similar small objects coming to the face (eyes, mouth, and nose) and going from the wearer to the opposite side.

Opponents:

- Upper plastic part (with tire)
- Bottom plastic piece
- Film (3 pieces)

Product Features:

- Made of protective film, which does not tire the eyes.
- It is for personal use during mutual speaking, all transactions (medical examination, greetings, sales, meeting, etc.).
- It is light, easy to use, and simple to take off and put on.
- Adapts to every head with its adjustable structure.
- It does not cover your field of view; the field of view is wide.
- Since it has high light transmittance, it does not cause image loss.
- It is anti-fog and suitable for use with prescription glasses.
- Helps prevent your hands from touching your mouth, nose and face.

Directions for Use:

The 4-hole upper part of the film is attached to the rubberized upper plastic piece through the holes. The bottom of the film with 3 holes is attached to the bottom plastic piece through the holes. Head adjustment is made through the rubber holes. The installed visor is attached to the head.
