Daavlin Phototherapy Solutions

3series^x

The Daavlin 3 Series X

The Daavlin 3 Series X combines state-of-the-art design with the reliability of Daavlin's Flex Dosimetry control system.

The Daavlin 3 Series X IS SIMPLE, EFFECTIVE AND RELIABLE

The Daavlin 3 Series X is available in a variety of lamp configurations including 24 and 48 lamp Narrow Band UVB units as well as combination UVA and Narrow Band UVB units.

Accurate and Reliable

- Daavlin's Flex integrating dosimetry system has a built-in meter which measures energy output in real time as the treatment is progressing.
- Dosimetry ensures the delivery of the exact dose, regardless of factors which may influence output such as lamp age, room temperature or line voltage.
- Power output and lamp age can be displayed at the touch of a button.

Practice Friendly

- The easy-to-clean, mar-resistant exterior keeps the device looking new for years.
- A document slot provides a convenient place to store operating manuals, time charts or other documents.
- Safety features include a removable key that prevents unauthorized use of the device. Protective grid provides protection from accidental contact with the lamps.

Patient Amenities

- A storage compartment provides a convenient place for patients' personal items such as jewelry, lotions or eyewear.
- A discreet observation window affords privacy for the patient, but allows the operator to observe the patient when necessary.
- 3 Series cabinets have spacious interiors that easily accommodate nearly any sized patient.
