AttractSPE® HLB

Lot Number: HL01M096-9

Manufacturer name: AFFINISEP

| Test | Specification | Result |
|---|----------------------|---------------|
| Surface area (m²/g) | 700 - 900 | Pass |
| Recovery yield (neutral compounds) | ≥ 80% | Pass |
| Particle diameter average (µm) | 33µm | Pass |
| Average Pore Diameter (A) | 60-90 | Pass |

Reference: HLB-100.S.6.200.HR

Product description: 200mg sorbent in a 6mL PP cartridge with PE frits. 100 columns by box

AttractSPE® HLB contains a polymeric reversed phase sorbent that was developed for the extraction of a wide range of acidic, basic and neutral compounds.

The sorbent is polystyrene divinylbenzene - N-vinylpyrrolidone copolymer.

Equivalent products to Oasis HLB and Strata-X

QC acceptance date **10/08/2022**
