- c. the product has been reformulated to exclude excipients not approved for use in pharmaceutical products in the country of import;
 - d. the product has been reformulated to meet a different maximum dosage limit for an active ingredient;
 - e. any other reason, please specify.
14. Not applicable means the manufacture is taking place in a country other than that issuing the product certificate and inspection is conducted under the aegis of the country of manufacture.
 15. The requirements for good practices in the manufacture and quality control of drugs referred to in the certificate are those included in the thirty-second report of the Expert Committee on Specifications for Pharmaceutical Preparations, WHO Technical Report Series No. 823, 1992, Annex 1. Recommendations specifically applicable to biological products have been formulated by the WHO Expert Committee on Biological Standardization (WHO Technical Report Series, No. 822, 1992, Annex 1).
 16. This section is to be completed when the product-licence holder or applicant conforms to status (b) or (c) as described in note 8 above. It is of particular importance when foreign contractors are involved in the manufacture of the product. In these circumstances the applicant should supply the certifying authority with information to identify the contracting parties responsible for each stage of manufacture of the finished dosage form, and the extent and nature of any controls exercised over each of these parties.

TO WHOM IT MAY CONCERN,

RE: Health Canada authorized signatories for CPP and GMP Certificates

This letter authorizes the electronic issuance of a Certificate of Pharmaceutical Product (CPP) or a Good Manufacturing Practices (GMP) Certificate by Health Canada. The purpose of an electronic certificate is to allow Health Canada to meet the requirements of the voluntary agreement set out in the WHO Certification Scheme on the Quality of Pharmaceutical Products during this period where paper-based certificates are unavailable. This certificate provides assurance to importing countries that the pharmaceutical products they will be importing are safe, effective, and of good quality.

A CPP is issued for human drugs (pharmaceutical, biological and radiopharmaceutical) as well as for veterinary drugs (food-producing animals and non-food producing animals).

Electronic versions of these certificates will now be issued to adapt to the current pandemic context and to provide this critical service through an efficient and streamlined process.

As the Director of the Health Product Inspection and Licensing Division within the Health Product Compliance Directorate of Health Canada, I delegate authority to the following individuals to sign electronic CPPs and electronic GMP Certificates and can attest to their identity and responsibilities within Health Canada.
