PCR TUBES PROVETTE PER PCR

PCR reaction tubes are made in highly purified and optically clear polypropylene. The ultra thin and uniform wall thickness guarantees fast and efficient heat transfer during amplification.

All PCR tubes are available with domed caps as well with flat caps, easily markable and pierceable.

All the caps guarantee a perfect leakproof, avoiding any risk of sample evaporation during the cycles. Optional "shielded" caps reduce the risk of any possible contamination.

Le provette per PCR sono realizzate in polipropilene altamente purificato e perfettamente trasparente.

Lo spessore delle pareti è ultra sottile ed uniforme al fine di garantire un trasferimento veloce ed efficiente di calore durante l'amplificazione. Tutte le provette per PCR sono disponibili con tappi a cupola e con tappi piatti, facilmente marcabili e perforabili. Tutti i tappi garantiscono una perfetta tenuta, eliminando ogni rischio di evaporazione del campione durante l'utilizzo. La versione con tappo con scudo di protezione riduce il rischio di eventuali contaminazioni.
